FOREWORD

Education is the key to our young people being full partners in shaping a global future and in shaping our province's and our nation's future. Quality education for our young people is key to maintaining Alberta's standard of living and ensuring our competitiveness in a world market. Our education system must focus on what all students need to learn in order to participate successfully in an economy and society undergoing fundamental changes. *Meeting the Challenge III: Three-Year Business Plan for Education, 1996/97–1998/99*, provides direction for the future of education in Alberta. It is a plan for Alberta students to be prepared well for the world of work and for lifelong learning.

The initiatives in the three-year business plan describe directions that will help all our young people get the education they need. These initiatives reflect Alberta Education's leadership role in developing programs for students, in setting standards for education, in communicating these expectations to our partners, and in supporting improvements that better meet student needs.

Schools have the responsibility to provide instructional programs that ensure students will meet the provincial graduation requirements and are prepared for entry into the workplace or post-secondary studies. As well, schools must ensure that students understand the rights and responsibilities of citizenship, and have the skills and disposition to pursue learning throughout their lives.

The directions and initiatives that have been outlined in the business plan are reflected in this handbook. For example, the provision for learning in the workplace through the Registered Apprenticeship Program; the provision for students to learn skills through career and technology studies while at school, and/or with the assistance of business to deliver some skills programs; the provision of the Kindergarten statement; and the provision for challenge assessments; all reflect a results orientation to curriculum.

The *ECS to Grade 12 Handbook* is released by Alberta Education for the use of administrators, counsellors, teachers and other parties engaged in the delivery of quality basic education. It has been developed to assist in the implementation of the objectives and underlying principles of the *School Act*. Policies, procedures and organizational information required to operate schools are included, or directions given for obtaining this information. The handbook serves the following purposes:

-
- identifies program requirements specified by Alberta Education, and provides the foundations upon which these requirements are based
 - provides information about learning expectations, education delivery and achievement standards for students enrolled in Alberta schools
 - communicates information useful in organizing and operating Alberta schools to meet the needs of students.

In school, students should be encouraged to challenge themselves at new levels and in new experiences, as well as to prepare themselves for future choices in their lives and in the lives of their communities. The Mission, Mandate, Principles and Beliefs section of the handbook defines basic education and addresses the learning expectations for students and schools. This focus on students is integral to all school programming and reflects the emphasis of the *School Act*.

Alberta Education's management system is policy-based and results-oriented. As much as possible, policies and procedures are used to set educational directions and goals. This handbook supports Alberta Education's objective of providing consistent direction while encouraging flexibility and discretion at the local level.

- Definitions

References to "boards" and "schools" in this document are in accordance with definitions used in the *School Act*. In this handbook, "local school authority" means the board of a public or separate school district, a regional division, a school division, the operator of a private school accredited by the Minister under section 22(2) of the *School Act* or a school operated by the Minister, such as the Alberta Distance Learning Centre.

- Identification of Requirements

This handbook contains information on a wide variety of topics. Some of the procedures are mandated; others are discretionary. Passages in **boldface** are requirements of Alberta Education and have been identified with an "R" beside their corresponding headings in the Table of Contents. Electronically, mandated procedures are indicated by boldface and a triangle icon.

- Internet

Alberta Education is on the Internet at <http://ednet.edc.gov.ab.ca>. The site contains information covering all areas of education in the province, from ECS to Grade 12. The organizational sections on the home page are: Students & Learning, Parents, Teaching, Education System, Funding, and Technology. From the home page, this handbook can be found under Education System; Department of Education; Legislation, Regulations, and Policy; *Guide to Education: ECS to Grade 12 Handbook*.

- Document Availability

All documents referenced in this guide, including just-in-time print copies of this handbook, are available for purchase from the Learning Resources Distributing Centre, unless otherwise stated.

- Identification of Content Changes

Δ Usually, a delta symbol in the left-hand margin of the text indicates revisions from the previous handbook. Amendments to the *School Act*, annual handbook updating and the new combined format have resulted in extensive and significant changes throughout. As a result, delta symbols no longer appear in text. Users are encouraged to familiarize themselves with this document in its entirety. Major changes are itemized on the last page of the Foreword, and the delta symbol appears beside relevant headings in the Table of Contents.

Readers are alerted to the following content changes.

Program Foundations

PROGRAM FOUNDATIONS: Mission, Mandate, Principles and Beliefs^①

Mission

“The Best Education For All Alberta Students.”

Mandate

Education is responsible for ensuring that all students have the opportunity to acquire the knowledge, skills and attitudes needed to be self-reliant, responsible, caring and contributing members of society.

Principles

- *Access to quality education:* Every student in Alberta has the right of access to a quality basic education which is consistent with the student's abilities and provides the necessary knowledge, skills and attitudes to fulfill personal goals and contribute to society as a whole.
- *Equity:* All students in Alberta will have access to a quality basic education regardless of where in the province they live.
- *Flexibility:* Within standards and policies set by the provincial government, there will be opportunities for choice in the public education system. School boards, schools and individual teachers have flexibility to meet the unique needs of the students and communities they serve.

① Excerpted from pages 4–7 of *Meeting the Challenge IV: Detailed Three-Year Plan for Education in Alberta, 1997/1998–1999/2000*. *Meeting the Challenge IV* is available from the Communications Branch.

-
- *Responsiveness:* The student is the focus of all activities in the education system: legislation, policies and practices must respond to the needs of students.
 - *Accountability:* All those involved in making decisions about educational matters, including the allocation of public funds for education, must be accountable for their decisions and choices. This includes the Minister of Education, school boards and their staff, parents, as well as students.
-

Beliefs

- All students have the right of equitable access to a quality basic education program that meets their diverse needs.
- Students are responsible for participating fully in the achievement of their educational success.
- All students must have strong reading, writing and math skills with which to develop critical thinking.
- Students are entitled to a safe, secure and caring learning environment where each individual is respected and valued.
- Education is an essential building block of our society's future.
- The education system must provide our society with creative and critical thinkers and problem solvers, who are prepared for the world of work, post-secondary studies, life-long learning and citizenship in a complex world.
- The education system must provide opportunities for students to acquire the entrepreneurial and technical skills and work habits required for success in the rapidly changing, high-tech global economy.
- Quality educational programs develop the total person—social, physical, intellectual, cultural and emotional dimensions.
- High learning expectations challenge all students to learn and achieve.
- The success of students is the shared responsibility of students, parents, school, community, and government.
- Parents should have opportunities for involvement in important decisions about their children's education.
- Parents and the public should have access to timely information about the performance and cost of the education system.
- The satisfaction of students, parents and the public is critical to the success of the education system.
- Resources and relevant decision making should be located where education happens.

-
- All those responsible for decisions about education, including the expenditure of education funds, are accountable to Albertans for actions and results.
 - Available resources can maintain and improve the quality of education for students if managed efficiently and innovatively.
 - The provision of educational funding must be fair, adequate, and affordable.
-

Basic Education in Alberta— the Definition

A school's first obligation is to provide a solid core program consisting of language arts, mathematics, science, and social studies.

Schools have the responsibility to provide instructional programs that ensure students will meet the provincial graduation requirements and are prepared for entry into the workplace or post-secondary studies. As well, schools must ensure that students understand the rights and responsibilities of citizenship, and have the skills and disposition to pursue learning throughout their lives.

Learning Expectations

Schools will be accountable for their students' achievement of provincial learning standards including employability skills consistent with workplace requirements. Schools will provide a variety of learning experiences so that students:

- **read for information, understanding and enjoyment**
- **write and speak clearly, accurately and appropriately for the context**
- **use mathematics to solve problems in business, science and daily-life situations**
- **understand the physical world, ecology and the diversity of life**
- **understand the scientific method and the societal context of science**
- **know the history and geography of Canada and have a general understanding of world history and geography**
- **understand Canada's political, social and economic systems within a global context**
- **research an issue thoroughly**
- **know how to work independently and as part of a team**
- **respect the cultural diversity of Canada and appreciate literature and the arts**
- **know the basic requirements of an active, healthful lifestyle**

-
- recognize the importance of accepting responsibility for their physical and emotional well-being and appreciate the role of the family and other relationships to that well-being
 - manage time and other resources needed to complete a task
 - use computer and communication technologies
 - demonstrate initiative, leadership, flexibility, and persistence
 - evaluate their own endeavours and continually strive to improve
 - have the desire and realize the need for life-long learning.

Schools also may provide the opportunity for students to acquire a second language. All students must be able to demonstrate competence in reading and writing English.

Education Delivery

Schools must engage students in a variety of activities that enable them to acquire the expected learnings. Many students will require concrete, hands-on approaches to achieve the expected results. Schools will have authority to deploy resources and may use any instructional technique acceptable to the community as long as the results are achieved. Schools and teachers are encouraged to take advantage of different delivery options such as distance education and workplace learning.

Senior high school students will be able to learn employability skills in the workplace. The school will provide support to ensure a broad theoretical understanding of those specific skills. The province will provide high school credit for workplace learning that is certified by the school and by the employer. This will ensure that students have the skills demanded by business and gain recognized work experience to assist in making the transition from school to work.

Wherever possible, school programs and credit granting procedures will be redesigned to ensure compatibility with post-secondary and occupational training programs, thus improving the efficiency of the entire system by removing duplication.

Standards for Student Learning

The province will define acceptable standards and standards of excellence for student achievement. Business will be a key player in defining the specific learning requirements of industry. Schools, school jurisdictions and the province will assess and report on the full range of student learning.

The school's primary responsibility is to ensure that students meet or exceed the provincial standards, as reflected in student learning expectations, provincial achievement tests, diploma examinations and graduation requirements. School boards and schools will consult with parents and other members of their communities about student performance, and set specific improvement targets in relation to provincial achievement test and diploma examination standards.

Program Planning

PROGRAM PLANNING: Programs of Study

Programs of Study

The following programs of study are prescribed by order of the Minister pursuant to section 25(1) of the *School Act*.

- *Program of Studies: Elementary Schools*
- *Program of Studies: Junior High Schools*
- *Program of Studies: Senior High Schools*

Mandatory requirements for programs and courses are outlined in the programs of study, each of which contains the following components:

- Program Rationale and Philosophy
- Learner Expectations
 - General Learner Expectations
 - Specific Learner Expectations.

All authorized learning and teaching resources available for purchase are listed in the Learning Resources Distributing Centre *Buyers Guide*, in both print and electronic formats. Also, all authorized resources are listed under the Authorized Resources Database through the Alberta Education home page on the Internet at <http://ednet3.edc.gov.ab.ca:1080/webdatabase/lrdb/lrdb.html>.

ECS to Grade 9 Programming

Early Childhood Services

Early childhood is a particularly significant period in human development, and the Early Childhood Services (ECS) programs provide services to address the developmental needs of children before they enter Grade 1. In ECS programs, young children participate as active partners in learning, build a set of shared experiences and develop knowledge, skills and attitudes that prepare them for subsequent learning.

The ECS program is a voluntary program, which may be offered by school boards, private schools and private ECS operators.

Kindergarten

Kindergarten, as part of the ECS program, **shall be planned, implemented and evaluated on the basis of the program of studies** outlined in the document *Kindergarten Program Statement*, 1995.

The *Kindergarten Program Statement*, available from the Curriculum Standards Branch, describes the learning achievement that will help prepare children for entry into Grade 1 and will provide them with a foundation for later success. The statement is the basis for all ECS programs funded by the province.

**Program
Organization
and Delivery****Kindergarten
Minimum Hours**

Where Kindergarten programs are offered, **approved operators shall provide at least 400 hours of program activities for each child in a centre during a fiscal year, or at least 18 in-home visits of one-and-a-half hours duration or more to each child in an in-home program during a fiscal year, or the equivalent in a combination of centre hours and in-home visits.**

Grade 1 to Grade 9

To ensure equitable access of opportunity for Grade 1 to Grade 9 students, a minimum number of instructional hours are specified.

In accordance with section 25(1)(c) of the *School Act*, and to allow for a balanced program that leads to the learning expectations indicated in the description of Basic Education, **schools are required to ensure that Grade 2 to Grade 9 students have access to 950 hours of instruction per year in each grade. For Grade 1, alternative minimum times enabling a smooth transition from ECS are permissible.**

Instructional time includes time scheduled for purposes of instruction, examinations/testing and other student activities where direct student-teacher interaction and supervision are maintained.

Instructional time does not include: teachers' conventions, professional development days, parent-teacher interview days, teachers' planning days, staff meetings, statutory and local school authority-declared holidays, lunch breaks, breaks between classes, recesses, class periods for the registration of students and extracurricular activities.

In programs using a language other than English or French as a language of instruction, the regulations regarding percentage of time in each language must be followed.

**Organizing
Instructional
Time**

The following requirements and considerations apply.

- All students must be provided access to a specified number of hours of instructional service. See the Kindergarten Minimum Hours and Grade 1 to Grade 9 sections under Program Organization and Delivery.
- Subject to the above requirement, the scheduling of instructional time is a local matter.

- All students should be provided sufficient opportunity to achieve the learner expectations outlined in the programs of study. To assist schools in planning, recommendations regarding the apportioning of instructional time are provided in the sections that follow.
- Organization for instruction may be based on an integrated programming model. Where programs are integrated, the learner expectations from two or more programs may be addressed within a common time block.

Elementary Program Required Components

In planning elementary programs, the following recommended percentage time allocations are identified as a general guide. The actual times required to meet learning expectations in each subject area may vary from student to student.

Percentage Time Allocations Recommended

Grade 1 and Grade 2

Required Subjects	Percentage
Language Arts	30%
Mathematics	15%
Science	10%
Social Studies	10%
Art and Music	10%
Health and Physical Education	10%
Time for optional components (e.g., French, drama, religious instruction) or additional allocations to the required subjects listed above.	15%

Grade 3 through Grade 6

Required Subjects	Percentage
Language Arts	25%
Mathematics	15%
Science	15%
Social Studies	10%
Art and Music	10%
Health and Physical Education	10%
Time for optional components (e.g., French, drama, religious instruction) or additional allocations to the required subjects listed above.	15%

Elementary Program Optional Components

At the elementary level, programming may include one or more optional components. Optional components are those parts of the elementary school program that are based on learning expectations other than those outlined for required subjects.

Optional components may be developed and approved at the local level, as per section 44(1)(a) of the *School Act*. The following areas are optional components for which learning expectations have been developed at the provincial level.

- Blackfoot Language and Culture Program
- Computer Literacy
- Cree Language and Culture Program
- Drama
- French as a Second Language
- Ukrainian Language Arts

Junior High Instructional Time

At the junior high level, schools must provide access to 950 hours of instruction per year in each grade.

Junior High Program

The primary consideration that schools must take into account when organizing for instruction, is to provide their students with an opportunity to meet all of the requirements of a basic education. The junior high school program should be organized in the context of the learning expectations included in the Mission, Mandate, Principles and Beliefs section of this handbook.

A course in junior high school represents a set of specific knowledge, skills and attitudes. Most students can achieve these in the recommended times. It is recognized that some students can acquire the knowledge, skills and attitudes specified in a course of studies in less than the recommended time, while others will require more time.

- The recommended time allotment (hours per year) for each part of the junior high school program is:

Language Arts	150 hours or more per year
Mathematics	100 hours or more per year
Science	100 hours or more per year
Social Studies	100 hours or more per year
Physical Education	75 hours or more per year
Complementary Courses	150 hours or more per year
Health and Personal Life Skills	①

① Health and Personal Life Skills is a required course, but it is not necessary to offer this course each year. Therefore, it is recommended that Health and Personal Life Skills be offered for 150 hours or more over the three years, Grade 7 through Grade 9.

-
- For schools offering instruction in a language other than English (*School Act*, sections 5 and 6), the above time recommendations for core courses apply. In addition to English language arts, it is recommended there be a minimum of 150 hours of language arts in the language of instruction.
 - **Schools shall offer two provincially authorized complementary courses except where instruction in a language other than English (*School Act*, sections 5 and 6) is offered, then only one provincially authorized complementary course is required.**
-

Junior High Complementary Courses

Schools are required to offer complementary courses since they help students achieve the learning expectations outlined in the Mission, Mandate, Principles and Beliefs section of this handbook. Also, complementary courses reinforce learnings in language arts, mathematics, science and social studies, as well as address learnings that are not in these subjects.

Sequencing

Students should be encouraged to continue in Grade 8 and Grade 9 with at least one of the complementary courses selected in Grade 7.

The complementary courses are categorized as follows.

Environmental and Outdoor Education

Ethics

- This course may be offered in Grade 7, Grade 8 or Grade 9.

Fine and Performing Arts

Art

Drama

Music

- Choral
- General
- Instrumental

Locally Developed/Acquired and Authorized Complementary Courses

Native Languages

Blackfoot Language and Culture Program

Cree Language and Culture Program

Practical Arts

Agriculture: Land and Life

Business Studies 9

Computer Studies

Home Economics

Industrial Education

-
- Schools may wish to incorporate modules from the appropriate interim Career and Technology Studies (CTS) strands into existing Practical Arts courses.

Note: Practical arts courses will be replaced by career and technology studies (CTS) strands in the 1997-1998 school year. Also see under Career and Technology Studies in the Courses and Programs section of this handbook.

Religious Studies

- Religious studies may be offered at the discretion of the local school board, under section 33 of the *School Act*.

Second Languages

French
German
Ukrainian

- French as a Second Language: French as a Second Language (FSL) is a program in which the French language is taught as a subject, often between 30 and 40 minutes a day, to help students develop communication skills, language knowledge and cultural awareness in French.

Policy 1.5.2 in the *Alberta Education Policy, Regulations and Forms Manual* states that because of the bilingual nature of Canada, Alberta Education encourages opportunities for all Alberta students to learn French by supporting programs and services for French immersion programs and French second language courses.

School boards may begin the program at different grades as the FSL program is not grade specific. Many schools begin FSL in Grade 4, but others may not start until Grade 7 or later. Students entering junior high school may begin their French language experience, or they may continue developing their language proficiency, depending upon the level attained in elementary school.

The French as a second language program is organized into three language proficiency levels: Beginning, Intermediate and Advanced. Each of these proficiency levels is then further divided into three sublevels. Students start at the Beginning level and progress through the Beginning 1, Beginning 2 and Beginning 3 sublevels and then continue with the Intermediate 4, 5 and 6 sublevels. Students may take several years to reach Beginning level 3 or Intermediate level 6 proficiency, depending on the amount of time provided and the type of program delivery.

Boards shall also develop, keep current and implement written policy and procedures consistent with provincial policies and procedures for FSL.

- Other Second Language Courses: The two-year junior high school German program may be offered in any of Grade 7, Grade 8 or Grade 9.

The Government of Alberta has recognized the multicultural nature of the province through the *Alberta Multiculturalism Act*, 1984 [Amended 1990] and the *Language Education Policy for Alberta*, 1988. Accordingly, Alberta Education encourages local school authorities to develop second language courses to meet the needs of the local community when such courses are not available as provincially authorized courses. Guidelines and procedures for the development and authorization of these second language courses are contained in the *Alberta Education Policy, Regulations and Forms Manual*. For further information, contact the Curriculum Standards Branch.

Interdisciplinary Studies

The programs referred to in this handbook are outlined in subject area categories. Organization for instruction may be based on these subject categories or on a locally developed integrated programming model. Where integrated programming is provided, schools should ensure that records of student progress indicate the achievement of students in each subject area, and that information on student progress is available to parents in that form.

Planning Junior High Course Selections

A student's choice of programs is subject to approval of the principal, except where a student (age 16 or over) elects to take distance learning courses. Steps should be taken to ensure parents understand and concur with their children's course selections. Principals should ensure students are made aware of special programs available to meet their individual educational needs. Students eligible for French language education under section 23 of the *Canadian Charter of Rights and Freedoms*, and registered in a francophone school or program, should be given the opportunity to complete most of their required course work in French. Native students may access resources and programs designed to reflect and respect Native cultures.

Planning in Junior High for Senior High Programs

Students should be provided with assistance in planning their high school programs. Certain courses are required for a diploma or a Certificate of Achievement. Some Grade 10 courses are prerequisites for more advanced high school courses. When junior high school students are planning their Grade 10 programs, all students and parents should become familiar with the guidelines in order to avoid possible difficulties in the later high school years.

When assisting students in planning their programs, junior high school staff should ensure that students discuss their proposed programs with their parents and keep in mind the credit requirements for graduation from senior high school. These requirements are outlined in the *Alberta High School Graduation Requirements* and *A Credit to Yourself* booklets available free from the Curriculum Standards Branch, or viewable through the Alberta Education home page on the Internet.

Senior High School Programming

School Organization

School jurisdictions are to develop methods of school organization that best meet the needs of their students. For instance, jurisdictions are encouraged to adopt alternatives to the current Carnegie Unit organizational model where such alternatives are in the best interests of individual students.

Any method of delivery must ensure that each student has access to at least 25 hours of instruction per high school credit for courses other than a 3-credit course. For a 3-credit course, a student shall have access to at least 62.5 hours of instruction.

Schools are required to ensure that students have access to 1000 hours of instruction per year.

Instructional time includes time scheduled for purposes of instruction, examinations, and other student activities where direct student-teacher interaction and supervision are maintained.

Instructional time does not include: teachers' convention days, professional development days, parent-teacher interview days, teachers' planning days, staff meetings, statutory and school board-declared holidays, lunch breaks, breaks between classes, time taken for the registration of students and extracurricular activities.

When methods of delivery of the required course content vary from the time-credit model of organization, the method shall ensure that the student may successfully meet local or provincial evaluation criteria.

A credit at the high school level represents course-specific knowledge, skills and attitudes. Most students can achieve a credit with approximately 25 hours of instruction. It is recognized some students can acquire the knowledge, skills and attitudes specified for a credit in a course of studies in less than 25 hours, while others will require more time.

Program Organization

Priority should be given to offering a high school program that enables students to:

- meet diploma requirements (see the Senior High School Graduation Requirements section)
- earn a minimum of 100 credits in three years
- have some opportunity to take complementary courses
- enter post-secondary institutions or seek employment.

Assisting in Student Planning

Certain courses are mandatory in order to meet diploma and certificate requirements. Some Grade 10 courses are prerequisites for more advanced high school courses. In order to avoid possible difficulties in later high school years, principals should ensure that students planning their Grade 10 programs are familiar with the guidelines. To assist in planning, refer to the booklet *A Credit to Yourself*, 1993, blackline masters of which are available from the Curriculum Standards Branch.

Note that the number of credits for each course in which a student is enrolled is not checked by Alberta Education. Principals are urged to ensure that credits to be earned are recorded correctly and checked carefully at the school level.

Student Information Needs

- Students should be given assistance in planning their high school programs. Steps should also be taken to secure parents' understanding of and concurrence with their children's registrations.
- In planning a program, schools should ensure that students keep in mind the requirements for a diploma or a certificate as outlined in this handbook.
- In addition to graduation requirements, a student's choice of subjects in high school may be governed by

requirements adopted by the local school authority that has jurisdiction over the student, provided that these requirements do not contravene the provisions of this handbook.

In providing assistance to students planning their programs, care should be taken to ensure that such programs will enable each student to attain the aim of either meeting entry requirements for post-secondary programs or acquiring the knowledge, skills and attitudes that will facilitate direct career entry.

- Students under age 16 may take distance learning courses from the Alberta Distance Learning Centre, subject to approval of the principal. Students aged 16 or over do not require approval of the principal to take correspondence courses. For further information about the Alberta Distance Learning Centre, see the Instructional Delivery section.
- Students should be made aware of special programs that are available to meet their individual needs or the needs of their community.
- Students eligible under section 5 of the *School Act* have the opportunity to complete most of their required course work in French.
- Native students may also access resources and programs that are designed to meet their needs and to further their knowledge of Native languages and cultures. Alberta Education's policy on Native education is provided in the *Alberta Education Policy, Regulations and Forms Manual*.

Scholarships

All students should be made aware of the requirements for the Alexander Rutherford Scholarships for High School Achievement.

These scholarships are awarded to students achieving a minimum average of 80% in five designated subjects in Grade 10, Grade 11 and Grade 12.

Also, the top ten Alberta students graduating from Grade 12, as determined solely on the basis of diploma examination results in English Language Arts 30 or Français 30, Social Studies 30, and three other diploma examination subjects, are recognized as "Rutherford Scholars."

For additional information, contact the Alberta Heritage Scholarship Fund.

**General
Requirements for
Admission to
Post-secondary
Educational
Institutions**

Possession of an Alberta high school diploma or certificate does not necessarily guarantee admission to a post-secondary institution. Students who intend to enter a post-secondary institution should be advised, as early as Grade 10, to check the calendars of these institutions for admission requirements, and they should plan their senior high school programs accordingly.

Refer to Appendix 1 for guidelines to assist in planning high school vocational and career and technology studies programs for articulation with the Alberta Apprenticeship and Trade Certification programs.

**Percentages
and Letter
Gradings**

Marks are to be submitted to Alberta Education in percentages. Physical Education 10, taken through a home education program, may be submitted as a pass or a fail.

Evaluations of course work completed outside of Alberta in schools recognized by the Minister, whenever possible, are to be reported in percentages that conform to the Alberta scale below, or may be reported as a pass or a fail.

Percentage Scale	Letter Grading
80 – 100	A
65 – 79	B
50 – 64	C
0 – 49	F

The Alexander Rutherford Scholarships for High School Achievement require that achievement and evaluation in completed courses be reported in percentages. Subjects in which achievement is reported by letter grade will not be considered in the calculation of averages by the scholarship fund administrators. For additional information, contact the Alberta Heritage Scholarship Fund.

**High School
Summer, Evening
and Weekend
Programs**

Summer, evening and weekend programs for senior high school students may be offered by boards, accredited private schools and other accredited high schools; e.g., Alberta vocational colleges, private and public colleges.

The requirements noted in this handbook apply to all schools offering senior high school summer, evening and weekend programs for credit, with the exception that for these programs, schools must provide access to instruction of at least 16 hours per credit.

The exception to the above is that Work Experience 15–25–35 requires 25 hours per credit even when offered in summer, evening or weekend programs.

Courses and Programs

Agriculture 10-20-30

No provincial program of studies is available for Agriculture 10-20-30. These courses may be developed as extensions of the complementary junior high school Agriculture: Land and Life courses.

Interim strands in agriculture became available through the career and technology studies program in the 1994-1995 school year. Agriculture 10-20-30 will be replaced by CTS upon its provincial implementation in the 1997-1998 school year.

This series of courses is not accepted for meeting the science requirement of the Alberta High School Diploma, the General High School Diploma, the Advanced High School Diploma or the Certificate of Achievement.

Career and Life Management (CALM) 20

CALM 20 may be taken by senior high school students in their Grade 10, Grade 11 or Grade 12 year.

Principals may wish to consider the option of having students take CALM 20 in either their Grade 10 or Grade 12 year, if such students plan to take three sciences as well as a fine arts or career and technology studies course in Grade 11.

Exemptions

Transfer-in students and mature students may be exempted from the CALM 20 requirement. See under the Grade 12 Exemptions for Transfer-in Students section and the Special Provisions for Mature Students section.

Career and Technology Studies

Career and technology studies (CTS) is a program being phased into junior and senior high schools from 1992 to 1997. CTS is a results-based curriculum with an integrated structure that provides increased opportunity for schools to offer programs to meet the needs of students. The program restructures and expands on the present junior and senior high school business education, home economics, industrial arts and vocational education courses. After 1997, these practical arts courses are to be phased out.

CTS is organized into 22 strands. Course strands are made up of modules. Procedures and guidelines on how to register students and report their achievement have been provided to schools. Provincial implementation for all strands is scheduled for the 1997–1998 school year.

Agriculture
Career Transitions
Communication Technology
Community Health
Construction Technologies
Cosmetology
Design Studies
Electro-Technologies
Energy and Mines
Enterprise and Innovation
Fabrication Studies
Fashion Studies
Financial Management
Foods
Forestry
Information Processing
Legal Studies
Logistics
Management and Marketing
Mechanics
Tourism Studies
Wildlife

Replacing Junior High Practical Arts

In the 1997–1998 school year, career and technology studies will replace the following junior high practical arts courses and programs.

Agriculture: Land and Life
Business Studies 9
Computer Studies
Environmental and Outdoor Education
Home Economics
Industrial Arts

Designing CTS Courses

The CTS curriculum structure allows schools and teachers to design courses by combining 1-credit modules:

- within and across strands
- within and across levels (introductory, intermediate and advanced).

These courses are to meet all requirements for module sequences, facilities and equipment, and instructional qualifications for each strand defined in the *Guide to Standards and Implementation*.

Senior High School Credits for Modules Completed in Junior High School

Some students may successfully complete CTS modules while in junior high school. The senior high school principal may accept a recommendation from the junior high school principal that a student has successfully completed a module and should be given credit. This module can then be included when reporting student achievement through the normal student records system. The module(s) will also then be included in the student's transcript.

Note: The module challenge provision does not apply to these students.

More information is available in the *Funding for School Authorities: A Manual for School Jurisdictions, Private Schools and Private ECS Operators*.

Reporting Senior High CTS Courses

Appendix 7 outlines the reporting structure for student achievement. It also provides four Course Configuration Charts.

Challenge Programs

International
Baccalaureate
Program, Advanced
Placement Program,
and Locally
Developed/Acquired and
Authorized Complementary
Courses

Schools are encouraged to challenge capable students beyond the 10–20–30 course sequences. This challenge can be provided through the International Baccalaureate Program, or by preparing students to challenge the Advanced Placement Program examinations, or by offering locally developed/acquired and authorized complementary courses. These programs extend the learner expectations beyond the provincial 10–20–30 course sequences.

Schools should inform students of the acceptability of International Baccalaureate courses, of the Advanced Placement Program, and of locally developed/acquired and authorized complementary courses for credit and/or advanced placement by post-secondary institutions.

Schools should also inform students that these challenge programs do not replace the diploma requirements outlined in the Senior High School Graduation Requirements section.

Driver and Traffic Safety Education 10

Certificates for successful completion of Driver and Traffic Safety Education 10 are issued to students by high schools offering the course. Principals can obtain blanks of the Driver Education Certificate upon written request to the Curriculum Standards Branch.

To receive a certificate for insurance reduction purposes, the student must have a mark of 80% or higher on the school or government examination and a mark of 75% or higher for the in-car portion of the test.

If the student does not achieve a mark of 75% on the in-car portion of the test, the student may take the road test again at a local licensing agency. Once the road test is passed, the student forwards the information to the Curriculum Standards Branch and a certificate is issued.

Driver and Traffic Safety Education 10 **will consist of at least:**

- **30 hours of classroom instruction**
- **10 hours of observation of in-car practice**
- **10 hours of behind-the-wheel practice.**

Classroom instruction must be conducted by a certificated teacher. In-car observation and behind-the-wheel practice may be conducted by a certificated teacher or a noncertificated individual but must comply with the "Driver Training Regulations" under the *Highway Traffic Act*.

For further information, refer to Driver and Traffic Safety Education 10 in the Personal Development section of the *Program of Studies: Senior High Schools*.

English as a Second Language

Schools with students learning English as a second language should refer to the English as a Second Language Policy in the *Alberta Education Policy, Regulations and Forms Manual* and the *Language Education Policy for Alberta*, 1988.

For further information about curricular documents, consult the *Language Education Policy for Alberta*, 1988, or contact the Curriculum Standards Branch.

French Language

Language Policy

School boards shall develop, keep current, and implement written policy and procedures for French Immersion Programs, French as a Second Language courses and immersion and second language courses in other languages. For more information, see the *Alberta Education Policy, Regulations and Forms Manual*.

Locally Developed Courses

Locally developed/acquired and authorized courses in second languages are also available. Refer to the *Locally Developed/Acquired and Authorized Junior and Senior High School Complementary Courses* policy in the *Alberta Education Policy, Regulations and Forms Manual*, see Appendix 3 of this handbook, or contact the Curriculum Standards Branch for further information.

French as a Second Language Program

The new French as a Second Language (FSL) program consists of seven courses: French 13 and French 10 are Beginning level courses, French 20 and French 30 are Intermediate level courses, and French 31a, 31b and 31c are Advanced level courses. Effective in 1995–96, the school-leaving standard for French as a Second Language is the new French 30 course.

French 13 and French 10 were implemented provincially in the 1993–1994 school term. The new French 20 was implemented in 1994–1995 and French 30 was implemented in 1995–1996. French 31a was implemented provincially in the 1994–1995 school year. French 31b was implemented in 1995–1996 and French 31c was implemented for the 1996–1997 school year.

The former FSL courses have been phased out, and the (New) course codes can be found in Appendix 2.

When students enter senior high school, they should be placed in FSL courses that correspond to their level of proficiency. For example, a student who has acquired the skills and knowledge required in FSL Beginning level 3, should be placed in French 20. School boards are encouraged to develop procedures to appropriately place students in senior high school FSL courses.

French 13 is a course for students who have not taken French before entering senior high school, or for students who have not attained proficiency at Beginning level 1/2, the prerequisite for French 10.

**Concurrent
Registration
in French
Language Courses**

Effective in September 1996, the concurrent registration provision was discontinued at all grades and for all French language courses. The concurrent registration process has been replaced under the provisions in the Course Challenge Policy 1.9.1.

**French as a
Second Language
Course Challenge**

Students planning to use French as one of their courses for Alexander Rutherford scholarship purposes may present a French course at each level (10–20–30/31). Students who go directly into French 31a, 31b or 31c may use only these courses to meet the Grade 12 scholarship requirements. For these students to meet the Grade 10 and/or Grade 11 scholarship requirements, they would have to challenge French 10 and/or French 20. This provision is under review.

Exceptions

French 13 is excluded from the course challenge and waived prerequisite provisions.

**Industrial
Education**

A student wishing to establish a prerequisite to a 22-level course shall take 5 credits in one of the following:

- **four modules from related Industrial Education 10–20–30 courses, or**
- **a 12- or 15- or 16-level course in the appropriate vocational or occupational program, or**
- **Practical Arts 15a or 15b. (These courses are each composed of half of two related 10-, 12- or 15-level courses.)**

Instruction in Languages Other than English

Bilingual Programs

According to section 6 of the *School Act*, a local school board may authorize the use of a language other than English or French as a language of instruction. In such cases, English must be used as the language of instruction for not less than 50 per cent of the school day. A Ukrainian Language Arts (ECS to Grade 12) program of studies is available provincially. Local school authorities wishing to develop a language arts program in a language other than English or French should consult the document *Framework for a Locally Developed Language Arts Curriculum for a Language Other Than English or French (ECS–Grade 12)*, 1989.

Francophone Programs

Section 5 of the *School Act* states that where individuals have rights under section 23 of the *Canadian Charter of Rights and Freedoms* to have their children receive school instruction in French, their children are entitled to receive that instruction in accordance with those rights wherever in the province those rights apply. Such students are referred to elsewhere in this handbook as “students attending francophone programs or schools.” School jurisdictions should consult the *Language Education Policy for Alberta*, 1988 and the *Alberta Education Policy, Regulations and Forms Manual*. For further information, contact the Language Services Branch.

French Immersion Programs

Instructional Time

According to section 6 of the *School Act*, a board may authorize the use of French or any other language as a language of instruction. Alberta Education encourages opportunities for all Alberta students to learn French by making available programs and services for French immersion and French as a second language courses.

School jurisdictions are asked to consult the *Language Education Policy for Alberta*, 1988, as well as the *French Language Immersion Regulation* and the *Languages Other than English or French Regulation* contained in the *Alberta Education Policy, Regulations and Forms Manual*.

Regulation 36/89 states that **notwithstanding section 3, the amount of time French is used as the language of instruction in a French immersion program shall be:**

- in the case of grades 1 to 6, not less than 50% of each school day,
- in the case of grades 7 to 9, not less than 40% of each school year, and
- in the case of grades 10 to 12, not less than 30% of each school year.

Additional information is available in the *Alberta Education Policy, Regulations and Forms Manual* and from the Language Services Branch.

French as a Second Language Instructional Time

It is recommended to boards that offer French as second language courses that students have access to these courses for:

- 90 hours per year in grades 1–6;
 - 75 hours per year in grades 7–9; and
 - 125 hours per course in grades 10–12.
-

Second Language Programs in Languages Other than English or French

Second language courses have been developed provincially for Blackfoot, Cree, German and Ukrainian.

The Blackfoot and Cree Language and Culture programs are intended for students beginning their study of these languages in Grade 1; however, both programs may be adjusted to meet the learning needs of students who commence their studies at a later stage. A two-year program is available in German. A Ukrainian Language Arts program is available for students beginning the study of this language in Grade 7. Information on French as a Second Language is outlined in the section Junior High Complementary Courses.

Further information is available in the *Alberta Education Policy, Regulations and Forms Manual*; the *Language Education Policy for Alberta*, 1988; and from the Curriculum Standards Branch.

Integrated Occupational Program

The Integrated Occupational Program (IOP) is a five-year program that begins in the Grade 8 year of schooling and continues through the Grade 12 year of schooling.

The IOP is intended for students who require an integrated program that enhances their academic and occupational competencies as well as their ability to enter into employment and/or continuing education and training. The program provides students with opportunities to acquire, consolidate and expand on knowledge, skills and attitudes necessary for successful transfer to regular programs or for progression through the IOP.

The Integrated Occupational Program is available to students in grades 8, 9, 10, 11 and 12 in jurisdictions that choose to offer the program. Certificates of Achievement are awarded to successful graduates of the program. Most students entering the senior high IOP will have completed the junior high IOP. However, students may enter the Integrated Occupational Program in their Grade 10 year.

The following criteria have been established which, taken together, may help determine students' eligibility for the Integrated Occupational Program.

- Age: Students must be 12 years and six months of age or older as of September 1 of the current school year and be entering their Grade 8 year.
- Achievement: Candidates for the Integrated Occupational Program have a range of abilities and interests. They demonstrate reading, writing, computational and other levels of achievement below those of their age peers. The differences in their achievement tend to make it difficult for them to experience success in a diploma program.
- Related Factors: Some of the factors that should be considered are: behaviour, motivation, emotional makeup, psychomotor coordination, work habits, attendance, persistence.
- Learning Styles: Candidates benefit from concrete learning experiences.

IOP academic courses focus on the development of knowledge, skills and attitudes necessary for everyday living at home, in the community and on the job. IOP practical arts and occupational courses provide students with the opportunity to apply the knowledge, skills and attitudes developed in academic courses and, at the same time, prepare them for entry-level job opportunities in eight occupational clusters.

The eight occupational clusters are: agribusiness, business and office operations, construction and fabrication, creative arts, natural resources, personal and public services, tourism and hospitality, and transportation. Community partnerships are integral to all IOP courses. See Off-campus Education in this section of the handbook.

To qualify for funding, local school authorities must be able to demonstrate, upon the request of Alberta Education, that a five-year program is available to students within the jurisdiction or by agreement among two or more jurisdictions.

Further information is provided in the *Integrated Occupational Program Information Manual for Administrators, Counsellors and Teachers*, 1994; in the *Alberta Education Policy, Regulations and Forms Manual*; and in the *Funding for School Authorities: A Manual for School Jurisdictions, Private Schools and Private ECS Operators*.

**Junior High
IOP Core and
Practical Arts
Courses**

A student shall have access to a minimum of 950 hours of instruction at Grade 8 and Grade 9.

- The recommended time allotment for Integrated Occupational Program (IOP) courses is:

Minimum Core Time	575	hours per year
Minimum Practical Arts Time	225	hours per year
Unspecified Core and/or Practical Arts Time	<u>150</u>	hours per year
Minimum TOTAL Instructional Time 950 hours per year		

- The IOP practical arts component consists of Business Education, Personal and Public Services, and Technical/Occupational courses. Both Grade 8 and Grade 9 instruction are to include at least two of these three practical arts courses. For further information, refer to page 17 of the *Integrated Occupational Program Information Manual for Administrators, Counsellors and Teachers*, 1994.
- Unspecified time of 150 hours may be used to provide additional instructional time in the IOP academic core courses, complementary courses and/or the practical arts courses.

**Senior High
IOP Courses**

Although academic courses in the Integrated Occupational Program are designated 3-credit courses, schools are encouraged to provide more instructional time than would normally be allocated for a 3-credit course, if this would help to ensure student success.

Some students in the Integrated Occupational Program may wish to transfer to the Alberta High School Diploma route. Should this transfer occur, 10 credits in a 36-level course from any occupational cluster will satisfy the 10-credit requirement in any 30-level course for the Alberta High School Diploma. Students who transfer to the Alberta High School Diploma route must satisfy the requirements as outlined in the Senior High School Graduation Requirements section. Within the senior high school Integrated Occupational Program, transfer may occur following successful completion of 16-, 26- or 36-level courses.

Locally Developed/Acquired and Authorized Junior and Senior High School Complementary Courses

Alberta Education supports the local development and authorization of junior high school and senior high school complementary courses which do not duplicate provincially authorized courses, to further develop and cultivate the unique interests and abilities of students, to foster educational improvement and excellence through innovation at the local level to meet the unique needs of a local community.

In developing/acquiring instructional materials, the school board should take into account such criteria as curriculum fit, criteria for promoting respect and understanding, appropriateness for student developmental stages and criteria for instructional design.

Instruction in a locally developed course being offered for credit should not commence without the prior approval of the local school authority.

For a listing of locally developed/acquired and authorized senior high school complementary courses, refer to Appendix 3 of this handbook.

For further information on locally developed/acquired and authorized junior and senior high school complementary courses, refer to the *Alberta Education Policy, Regulations and Forms Manual*.

International Baccalaureate

Local school authorities offering the International Baccalaureate program are permitted to develop and authorize these courses. Only those schools offering the International Baccalaureate program are permitted to use these courses.

Religious Studies

Local school authorities requiring the authorization or reauthorization of religious studies courses are to continue following the *Locally Developed Religious Studies Courses* policy. **A description of each course**, as outlined in procedure 5 of the *Locally Developed/Acquired and Authorized Junior and Senior High School Complementary Courses* policy, contained in the *Alberta Education Policy, Regulations and Forms Manual*, will be forwarded to the Director, Curriculum Standards Branch.

School authorities wishing to offer locally developed religious studies courses for credit should refer to the *Locally Developed Religious Studies Courses* policy. These courses continue to **require Ministerial Authorization**.

All school authorities wishing to continue offering locally developed religious studies courses for credit shall submit their requests for reauthorization to the Director, Curriculum Standards Branch, every three years.

Music— Private Study

When a student requests music credits for private study, in voice or an instrument, a principal may grant 5 credits for each of:

- Choral Music 10 for voice or Instrumental Music 10 for an instrument
- Choral Music 20 for voice or Instrumental Music 20 for an instrument
- Choral Music 30 for voice or Instrumental Music 30 for an instrument.

Students are not to receive credits for both school music and music by private study when those programs are both instrumental or both choral [voice]. The maximum credits a student can earn in either a Choral Music 10–20–30 program or an Instrumental Music 10–20–30 program is fifteen. For example, a student cannot earn 15 credits in instrumental school music and another 15 credits in instrumental private study. This does not affect locally developed/acquired and authorized courses.

Credits for work in private music study completed in previous years may be applied to courses in advance of the student's current grade level.

If a student presents an official transcript verifying that he or she has achieved the learner expectations required for the equivalent of Grade 12 credit, the principal is to recommend the awarding of a maximum of 15 credits in music (5 each for Grade 10, Grade 11 and Grade 12), whether or not the student has documentation for all the required components for equivalent credits for Grade 10 and Grade 11.

Similarly, if a student has achieved the learner expectations required for Grade 11 equivalency, the principal is to recommend the awarding of 10 credits in music (5 each for Grade 10 and Grade 11).

The chart, which follows, provides the information necessary for principals to recommend credits for music taken by private study.

The principal is to evaluate the documents, using the evaluation form available from the Educational Information Exchange. The completed evaluation form is to be forwarded to the Educational Information Exchange. To obtain credit, students are to have passed both the practical and the theory components listed in the chart for that grade level.

Marks submitted by schools to Alberta Education should be calculated for each grade level as follows:

Practical Component (Grade Level) – 70% of mark submitted
Other Components (Theory) – 30% of mark submitted

Note: Principals are to recommend credits only on the basis of official transcripts as issued by the Western Board of Music, the Royal Conservatory of Toronto or Mount Royal College, Calgary. Diplomas, photocopies of diplomas or photocopies of transcripts are themselves insufficient for evaluation purposes.

In those instances where a student does not provide an official transcript for each lower grade level being evaluated, the principal is to report a mark of "P" or "pass," rather than a percentage score, when recommending the awarding of waived credits.

**COURSES FOR WHICH CREDITS MAY BE RECOMMENDED
FOR MUSIC TAKEN BY PRIVATE STUDY**

	Woodwind, ^③ Brass, ^④ Percussion, Recorder	Grade 4 + Theory I	Grade 6 + Theory II	Grade 8 + Theory II
Mount Royal College, Calgary	Voice ^①	Grade 4 + Theory I	Grade 6 + Theory II	Grade 8 + Theory II
	Piano, Strings ^②	Grade 6 + Theory I	Grade 7 + Theory II	Grade 8 + Theory II
	Woodwind, ^③ Brass, ^④ Percussion	Grade 4 + Theory I	Grade 6 + Theory II	Grade 8 + Theory II

① All voice courses count as Choral Music 10–20–30 respectively for high school credits. All other courses are to be used for Instrumental Music 10–20–30 respectively.

② Strings include violin, viola, violoncello and double bass only.

③ Woodwind includes flute, oboe, bassoon, clarinet and saxophone only.

④ Brass includes trumpet, horn (French horn), trombone, euphonium and tuba only.

Off-campus Education

Alberta Education's three-year business plan encourages schools and teachers to take advantage of different delivery options, such as distance education and workplace learning. The policy document, *Off-Campus Education*, supports efforts made to enhance and expand learning through the use of community resources. The policy includes a number of programs and a range of instructional and delivery strategies.

The policy, effective September 1, 1994, is in the *Alberta Education Policy, Regulations and Forms Manual*, and replaces two previous policies; *Off-Campus Vocational Education*, and *Work Experience Education*. The 1994 policy:

- supports the use of off-campus initiatives across the curriculum; that is, courses and course components of both core and complementary subject areas
- supports the issuing of high school credit for workplace learning that is approved by the school and by the employer.

Specific procedures and legislation about off-campus education programs are provided in the *Off-campus Education Guide for Administrators, Counsellors and Teachers*, 1995 and the *Alberta Education Policy, Regulations and Forms Manual*.

The new off-campus policy includes the following categories:

- Cooperative Education/Work Experience 15–25–35
- Integrated Occupational Program
- Registered Apprenticeship Program
- Youth Internship Canada.

Program components include:

- community partnerships
- job shadowing
- job sharing
- mentorships
- work study.

Cooperative Education/ Youth Internship Program

"Cooperative Education" means off-campus experiential learning undertaken by a senior high school student as approved under policies established by the federal government and Alberta Education. The Cooperative Education option has not been available to new applicants since 1992. In 1994–1995, a new federal government option, the Youth Internship Program, became available to local school boards and accredited private schools. For further information on Cooperative Education and the Youth Internship Program, contact the Curriculum Standards Branch.

Human Resources Development Canada is not approving any new federal funding for Cooperative Education projects. Existing programs will continue to the expiry of the funding period.

Registered Apprenticeship Program

The Registered Apprenticeship Program (RAP) is a program in which students spend part of their time in school and part of their time in industry as registered apprentices in one of Alberta's 52 designated trades.

Information about RAP may be obtained from the Curriculum Standards Branch or from the nearest Career Development Centre of the Apprenticeship and Trade Certification Branch, Alberta Advanced Education and Career Development. Additional information, course sequences and course codes for RAP are contained in Appendix 1 and Appendix 4.

Work Experience 15-25-35

In accordance with the *Off-Campus Education* policy:

1. Each of the new Work Experience 15-25-35 courses, at each level, may be offered for 3, 4, 5, 6, 7, 8, 9 or 10 credits. For students who entered Grade 10 from September 1994 onward, the number of work experience credits that may count toward a diploma is limited to 15.
2. Career Readiness modules, available as components of the Career Transitions strand within the Career and Technology Studies program, are linked to the new Work Experience 15-25-35 courses, as follows.
 - The introductory module, CTR101: Job Preparation, is a required component of the first work experience course taken by a student.
 - The intermediate module, CTR201: Job Maintenance, is a recommended component of the second work experience course taken by a student.
 - The advanced module, CTR301: Preparing for Change, is a recommended component of the third work experience course taken by a student.

The following procedures associated with previous work experience education courses are retained.

- Each work experience course is to be time-based; i.e., 25 hours per credit.
- A student may enroll in Work Experience 35 without having completed Work Experience 15 and/or Work Experience 25.

-
- A student completing Work Experience 35 for 10 credits will have met the “10 credits in any 30-level courses” graduation requirement for the Alberta High School Diploma.
 - The provision of credits for waived prerequisite courses, as outlined in this handbook, does not apply to Work Experience 15–25–35. Nor does the course challenge provision apply.

Reporting Work Experience Credits

When schools report work experience marks and credits to the Educational Information Exchange, they are to report the marks and credits given for career transitions modules separately as career and technology studies courses. For example, a student taking work experience for 6 credits, which includes the CTR101 module, may have the CTR101 module as a 1-credit CTS course and the remaining 5 credits as the Work Experience 15 course. Alternatively, the 1-credit CTR101 module may be combined with credits earned from other CTR and/or CTS modules to form a 3-, 4-, 5- or 6-credit course.

Work Study/ Community Partnerships

Work study and community partnerships are components of other courses integrated into the teaching and experiential learning activities under the cooperative supervision of teacher–coordinators and employers.

Community partnerships included in the Integrated Occupational Program are addressed in the *Integrated Occupational Program Information Manual for Administrators, Counsellors and Teachers*, 1994.

Work Study

Work study education provides an opportunity for junior and senior high school students to apply the knowledge, skills and attitudes they have acquired in course work to real-life situations through a school–community partnership arrangement.

Work study includes experiential learning activities undertaken by a student:

- as an integral part of an approved school course or program
- under the cooperative supervision of the subject area teacher–coordinator and the employer.

It is recommended that junior high school work study take place between 8:30 AM and 4:30 PM, Monday through Friday.

Community Partnerships

Community partnerships are based on the belief that educators can enhance student learning experiences by bringing the community into the school and by placing students out into the community.

Using the expertise, talent and resources of community-based service organizations and agencies, and of business, industry, citizen groups and parents, schools can enrich the educational experiences of students.

Students may be introduced to the concept of community partnerships through such activities as:

- inviting members of the community into the school as guest speakers or to give demonstrations
- involving community members in special events, such as career days or education week
- touring local businesses and industries
- sharing resources, such as films, videos, booklets, pamphlets, equipment or specialized laboratory facilities
- participating in programs, such as work study, job shadowing or mentorships
- participating in community service activities.

Physical Education

As an integral part of the well-balanced physical education program, activities should be selected to contribute to the attainment of the learner outcomes.

Exemptions Junior and Senior High Schools

In the following specified circumstances, however, exemptions may be warranted from one or more dimensions of the course.

Category	Conditions for Exemption	Procedures	Alternative Experiences
INDIVIDUAL	Religious beliefs	<ul style="list-style-type: none">• Statement in writing from parent to principal.	<ul style="list-style-type: none">• When exemption is granted, alternative activities consistent with the goals and objectives of the specific dimension should be substituted, where appropriate.
INDIVIDUAL	Medical	<ul style="list-style-type: none">• Certification to principal by medical practitioner with statement of activities in which the student is not able to participate.	
CLASS, GRADE OR SCHOOL	Access to facilities	<ul style="list-style-type: none">• Initiated by local school authority or parent.• Approved by local school authority.	

Exemptions Senior High School

When a Grade 10 student is unable to meet the requirement for Physical Education 10 for medical reasons, every effort should be made to meet this requirement in Grade 11 or Grade 12.

Notice of a student's exemption from Physical Education 10 is to be reported by the principal, in writing, to the Educational Information Exchange, by April 30 in the year of the student's anticipated graduation.

Students exempted from the Physical Education 10 requirement are still to present the total number of credits required for graduation.

Home Education

The results for Physical Education 10, taken through a home education program, may be submitted to Alberta Education as a pass or as a fail.

Religious Studies

Religious studies may be offered at the discretion of the school board under section 33 of the *School Act*.

School authorities wishing to offer locally developed religious studies courses for credit . . . require Ministerial Authorization.

For further information, see the policy on *Locally Developed Religious Studies Courses* in the *Alberta Education Policy, Regulations and Forms Manual*.

Special Education

Alberta Education supports the education of students with special needs. "Students with special needs" are those students who require a different program or an adaptation or modification to a regular school program. Special education support is provided to help local school authorities and schools develop programs for students with disabilities or for gifted and talented students. Further information is provided in the *Alberta Education Policy, Regulations and Forms Manual*.

School jurisdictions are required to identify students with special needs, to develop and implement individual program plans (IPP) for those students and to evaluate their individual progress. Students with special needs taking curriculum courses for credit will be expected to meet those course

requirements. Where a student with a special need is unable to attend school for the required hours of instruction, the superintendent shall inform the Regional Office Branch of the reduction and the circumstances making the reduction necessary.

For further information regarding special education programs, contact the Special Education Branch.

Program Information

The *Guide to Education for Students with Special Needs*, 1995, is available free from the Special Education Branch.

The Special Education Branch has developed a new core series for special education titled *Programming for Students with Special Needs*. This series replaces several 1982–1983 curriculum documents (guides).

The *Teacher Resources Catalogue* is available free from the Special Education Branch.

Special Projects Credits

Special projects credits are designed to recognize work undertaken by students on an individual or small group basis and should not be used as a means of offering credits for unapproved courses. Students may enroll in Special Projects 10, 20 or 30. Special Projects 20 and Special Projects 30 do not have prerequisites.

Purpose

Special projects credits perform two major functions:

- Students become involved in the selection, planning and organization of their own programs.
- Students pursue activities in which they have considerable interest or ability but which are not within the scope of the regular curriculum or the programs being offered in the school.

Procedures

Requirements for special projects credits are:

- Each project shall be carried out under the supervision of a teacher.
- Students are required to submit a clearly planned proposal to the principal for approval. The proposal should include:

-
- a description or outline of the project
 - the number of hours of work expected to complete the project
 - a method by which the project is to be carried out
 - a description of the expected result
 - the evaluation procedures as outlined by a teacher
 - an expected completion date
 - the name of the supervising teacher.
- **The principal shall retain a copy of each special project proposal until the project is completed.**
 - **The opportunity to earn special projects credits shall be available to all students, including those attending an authorized summer school.**
 - **The content of the special project need not be related to a specific school subject.**
 - **If a special project is related to a specific school subject, the content of the project shall be distinct from and in addition to regular course requirements.**
 - **Projects shall be completed and reported to the principal prior to the conclusion of the semester or full term.**
 - **Where a project takes a student off campus, the provisions of the *Off-Campus Education* policy (see *Alberta Education Policy, Regulations and Forms Manual*) shall apply.**
 - **Special projects credits may be applied toward the Alberta High School Diploma and, until 1997, toward the Advanced High School Diploma (as unspecified credits only), and to the General High School Diploma (as either specified or unspecified credits).**
 - **Students who successfully complete projects are granted 3 credits for 75 hours of work or 5 credits for 125 hours of work in any one semester, or full term on the approval of the principal.**
 - **School jurisdictions shall develop policies to ensure overall consistency and standardization of procedures governing special projects in their schools. Evaluation and reporting procedures should be included in the policy.**

Restrictions on special projects are:

- **Special projects credits shall not be awarded for student activities that would be considered a normal part of extracurricular or cocurricular activities generally offered by a school; e.g., school team sports, school newspaper, yearbook.**

- In instances where a student enrolls in more than one special project, credits shall not be approved unless the projects vary substantially from year to year or demonstrate increased levels of proficiency.

Transfer Points (Recommended)

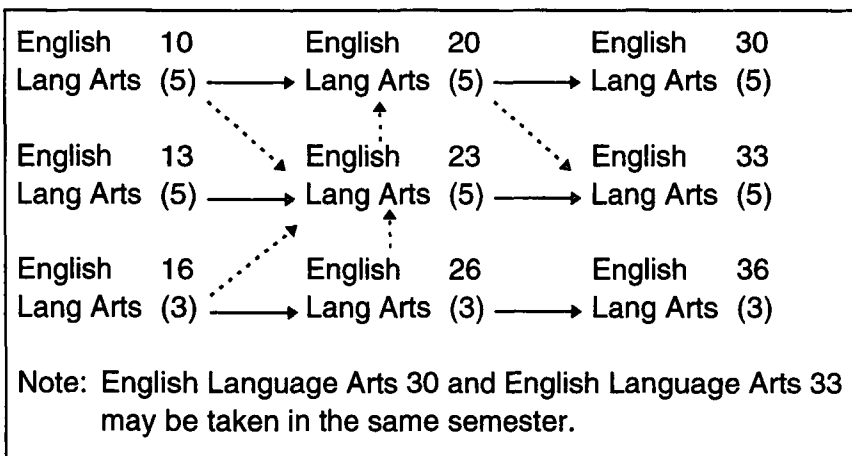

Provincially developed programs are designed to accommodate transfer between course sequences at particular points. Also see under Course Sequence Transfer, in the Awarding Course Credits section.

Special circumstances may warrant student transfer at other points in the curriculum; however, the recommended transfer points are as follows for:

- English Language Arts Program
- French as a Second Language Program
- Mathematics Program
- Science Program
- Social Studies Program
- IOP, Occupational Component to Industrial Education, Career Field.

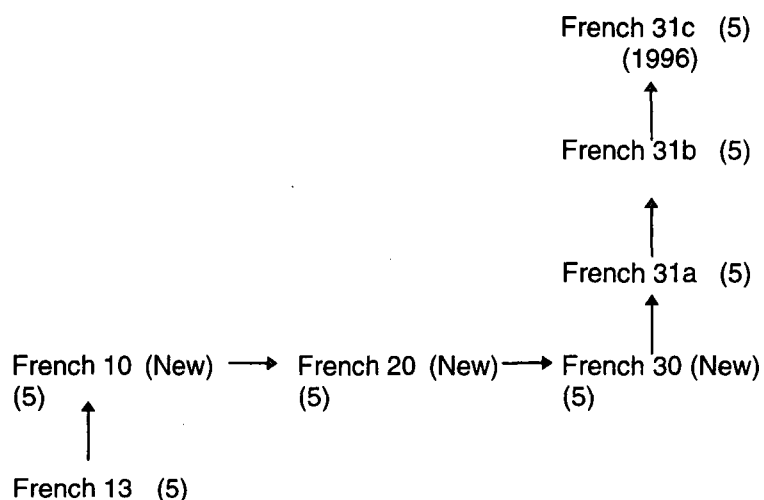

The local school authority shall have a policy that states clearly the criteria to be met by a student who wishes to change program routes.

English Language Arts Program

French as a Second Language Program

1. For Students Commencing French in Senior High School

Note: The implementation year is indicated in parentheses.

2. For Students Who Have Completed the Beginning Level Prior to Grade 10

Note: The implementation year is indicated in parentheses.

3. For Students Who Have Completed the Beginning Level and the Intermediate Level Prior to Grade 10

Note: The implementation year is indicated in parentheses.

Mathematics Program

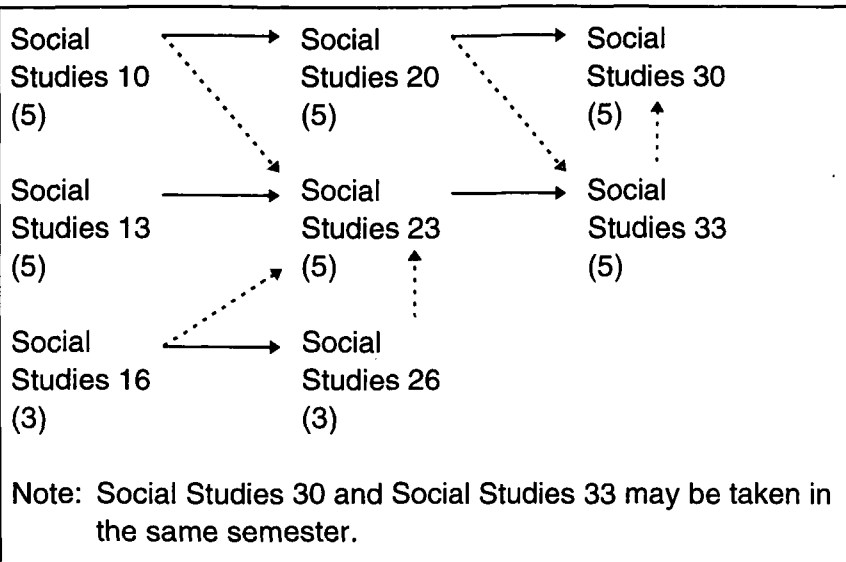

Note: Mathematics 30 and Mathematics 33 may be taken in the same semester.

*Mathematics 30 is the corequisite for Mathematics 31.

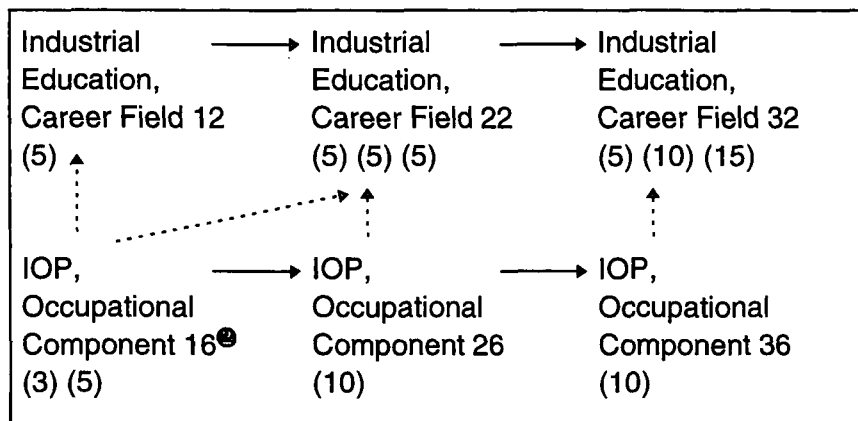

Science Program

Social Studies Program

IOP, Occupational Component^❶ to Industrial Education, Career Field

❶ The relationship between IOP, Occupational Component and the career and technology studies modules is under review.

❷ Transfer from a 16-level occupational course directly to a 22-level industrial education course may be considered where there is course equivalency.

Administrators are referred to the Senior High School Graduation Requirements section in this document for further information regarding student transfer to the Alberta High School Diploma route.

Program Administration

PROGRAM ADMINISTRATION: *The School Act*^❶

The School Act

The *School Act* sets out the legal parameters that govern the education of students in the province of Alberta. The management, operation and powers of school boards are outlined in the *Act*.

The *Act* gives the Minister the authority to set regulations in particular areas. Regulations provide specificity on matters for which there is regulation-making authority in the legislation. Regulations have the force and effect of law.

Provincial policies outline Alberta Education's position on significant educational issues.

Procedures specify how a policy is to be administered. They outline mandatory and discretionary activities, responsibilities and funding mechanisms.

The governance of education in Alberta is guided by the following principles:

- policies and procedures rather than rules will continue to be used for setting educational goals and directions
- the province will continue to provide consistent direction, while encouraging flexibility and discretion at the local school authority and school level by keeping policies and procedures to a minimum

❶ All references to the *School Act* are to the Statutes of Alberta 1988, Chapter S-3.1, as amended.

-
- all Alberta Education's regulations, policies and procedures are to be consistent with the objectives and underlying principles of the *School Act*.

The *School Act* is available for purchase from Publication Services, Alberta Government.

Role of the School Council

Section 17 of the *School Act* states:

- a school council shall be established in accordance with the regulations for each school operated by a board
- the majority of the members of a school council shall be parents of students enrolled in the school
- a board of a separate school district or a division made up only of separate school districts, by resolution, may require that the parents of students enrolled in a school operated by the board who are members of the school council must also be of the same faith as those who established the separate school districts, whether Protestant or Roman Catholic
- a school council may, at its discretion:
 - advise the principal and the board respecting any matter relating to the school
 - perform any duty or function delegated to it by the board in accordance with the delegation
 - consult with the principal so that the principal may ensure that students in the school have the opportunity to meet the standards of education set by the Minister
 - consult with the principal so that the principal may ensure that the fiscal management of the school is in accordance with the requirements of the board and the superintendent, and
 - do anything it is authorized under the regulations to do
- subject to the regulations, a school council may make and implement policies in the school that the council considers necessary to carry out its functions

These functions may include, but are not limited to, policies respecting:

- the nature of the programs offered
- the expenditure of money

-
- the educational standards to be met by students, and
 - the management of the school.
 - a school council may make by-laws governing its meetings and the conduct of its affairs
 - subject to the regulations, a board may develop and implement policies respecting school councils
 - a board shall establish an appeal process or conflict resolution procedure under which the principal or the school council may apply respecting disputes on policies proposed or adopted for a school
 - the Minister, on the request of the board, may dissolve a school council without notice at any time if the Minister is of the opinion that the school council is not carrying out its responsibilities in accordance with this Act and the regulations
 - the Minister may make regulations:
 - respecting the election or appointment of the members of a school council and the term or other conditions of election or appointment and the dissolution of a school council
 - respecting the roles of the principal and the school council of a school and their respective powers, duties and responsibilities
 - respecting any other matter the Minister considers necessary respecting school councils
 - exempting a school or class of schools from the application of this section.
-

Role of the Principal

Section 15 of the *School Act* states a principal of a school must:

- provide instructional leadership in the school
- ensure that the instruction provided by the teachers employed in the school is consistent with the courses of study and education programs prescribed, approved or authorized pursuant to this Act
- evaluate or provide for the evaluation of programs offered in the school
- ensure that students in the school have the opportunity to meet the standards of education set by the Minister

-
- direct the management of the school
 - maintain order and discipline in the school and on the school grounds and during activities sponsored or approved by the board
 - promote cooperation between the school and the community that it serves
 - supervise the evaluation and advancement of students
 - evaluate the teachers employed in the school
 - subject to any applicable collective agreement and the principal's contract of employment, carry out those duties that are assigned to the principal by the board in accordance with the regulations and the requirements of the school council and the board.
-

Role of the Teacher

Section 13 of the *School Act* states a teacher, while providing instruction or supervision, must:

- provide instruction competently to students
- teach the courses of study and education programs that are prescribed, approved or authorized pursuant to this *Act*
- promote goals and standards applicable to the provision of education adopted or approved pursuant to this *Act*
- encourage and foster learning in students
- regularly evaluate students and periodically report the results of the evaluation to the students, the students' parents and the board
- maintain, under the direction of the principal, order and discipline among the students while they are in the school or on the school grounds and while they are attending or participating in activities sponsored or approved by the board
- subject to any applicable collective agreement and the teacher's contract of employment, carry out those duties that are assigned to the teacher by the principal or the board.

Role of the Student

Section 7 of the *School Act* states a student shall conduct himself so as to reasonably comply with the following code of conduct:

- be diligent in pursuing his studies
 - attend school regularly and punctually
 - cooperate fully with everyone authorized by the board to provide education programs and other services
 - comply with the rules of the school
 - account to his teachers for his conduct
 - respect the rights of others.
-

Student Attendance

Attendance at school is compulsory for eligible students who, **at September 1 in a year, [are] 6 years of age or older, and [are] younger than 16 years of age** [*School Act*, section 8(1)]. Section 44(3)(b) of the *School Act* allows local school authorities to make rules respecting the attendance of students at school. Section 7(b) sets out expectations for student conduct regarding attendance at school, and section 9 addresses enforcing school attendance.

Section 10 Attendance at School

The Attendance Board provides a means to enforce compulsory school attendance. Referral of matters regarding student attendance to the Attendance Board is governed by section 10 of the *School Act* where:

- a student who is required to attend a school under section 8 does not attend school, and
- attempts to enforce school attendance under section 9 have, in the opinion of the board, not been effective,

the board of which the student is a resident student or that operates or supervises the school in which the student is enrolled may refer the matter to the Attendance Board.

- Where a student who is required to attend a school under section 8
 - is enrolled in a private school, and
 - does not regularly attend that private school,

and the person responsible for the operation of that private school has made all reasonable efforts to ensure that the student attends school, the person responsible for the operation of that private school shall refer the matter to the Attendance Board.

Section 110
Order of Attendance Board

Section 110 of the *School Act* states that on hearing a matter referred to it, the Attendance Board may order the parents and student to do a number of things, including directing the student to attend school or directing the parents of a student to send the student to school. An Order of the Attendance Board, when filed with the clerk of the Court of Queen's Bench, has the same force and effect as if the Order were an order of the Court of Queen's Bench.

Children may be exempted, by parental request, from two components of the health program: Theme V, Human Sexuality; and the Child Abuse Prevention Unit. Physical education exemptions are as outlined in this handbook.

For information on further exemptions by parental request, refer to section 8 of the *School Act*.

**Suspension and
Expulsion of
Students**

Principals and teachers should be aware of the relationship between the code of student conduct, section 7, and Suspension and Expulsion of Students, section 19 (1.1). Students and parents should also be provided with the information contained in these sections in order to familiarize themselves with what is acceptable for student conduct and the consequences, to both students and parents, should students fail to comply.

Section 19 of the *School Act* states:

- In this section, "suspend" has the meaning given to it in the rules made by the applicable board.
- a student may be suspended or expelled:
 - if in the opinion of the teacher, the principal or the board, as the case may be, the conduct of the student does not comply with section 7, or
 - for any other reason the teacher, the principal or the board, as the case may be, considers appropriate
- a teacher may suspend a student from one class period
- a principal may suspend a student from:
 - one or more class periods
 - one or more courses or school programs
 - school, or
 - riding in a school bus

-
- a principal may reinstate a student suspended by him or by a teacher
 - when a principal suspends a student, the principal shall:
 - forthwith inform the student's parent of the suspension, and
 - report in writing to the student's parent all the circumstances respecting the suspension
 - if a student is not to be reinstated within 5 school days from the date of his suspension, the principal shall:
 - forthwith inform the board of the suspension, and
 - report in writing to the board all the circumstances of the suspension together with the principal's recommendations
 - on receiving a report from a principal . . . the board shall, within 10 school days from the first day of the suspension, reinstate or expel the student
 - prior to a board's making a decision . . . the parent of the suspended student and the suspended student may make representations to the board with respect to the suspension
 - a board may re-enroll a student who has been expelled
 - if a student is expelled, the board shall notify immediately, in writing, the parent and, in the case of a student who is 16 years of age or older, the student of their right to request that the Minister review the matter.

Expulsion cannot be used indefinitely to deny an eligible student access to an education program. When addressing suspensions or expulsions, administrators also need to consider the following sections of the *School Act*.

- section 3, the right of access to an education
- section 8(3)(c,d), excused from compulsory attendance
- section 28(1), the responsibility of a board to provide resident students with an education program.

Alberta Education Policy, Regulations and Forms Manual

Policy Introduction

The *Alberta Education Policy, Regulations and Forms Manual* contains information that affects the operation of schools and has been developed for school boards and ECS private operators, for the following purposes:

- to communicate key policies of Alberta Education
- to provide direction to school boards and ECS private operators who wish to access provincial resources
- to provide school boards and ECS private operators with legislation, regulations, policies and procedures.

Schools operate under the jurisdiction of the local school authority. All actions undertaken by the principal, as referenced in this handbook, shall be in accordance with local school authority policy. Local policies and procedures shall be consistent with the requirements of Alberta Education.

The regulations and policies derive from the *School Act* and impart Alberta Education's philosophy. They provide direction to the educational system, support the rights of students and parents, and encourage flexibility at the local level.

Ministerial Orders and Directives

Human Sexuality Education

The Human Sexuality Education bulletin outlines requirements and recommendations for the implementation of human sexuality education in Alberta schools. Human sexuality components of the Grade 4 to Grade 6 Health program, the Grade 7 to Grade 9 Health and Personal Life Skills program, and the senior high school Career and Life Management 20 course, are prescribed.

Procedures

- **Every school operated by a board shall provide human sexuality education to students in Grades 4 through 9, and in at least one senior high course required of all students.**
- **Human sexuality education shall be taught within the normal school day.**
- **Human sexuality education may be offered through different instructional strategies. The goals and objectives outlined in current programs (Health, Health and Personal Life Skills, Career and Life Management 20) for human sexuality education are prescribed, but they need not be offered exclusively through those courses. Many schools have developed very successful programs through family life or religion classes.**
- **Parents shall be advised prior to the start of human sexuality instruction of their right to exempt their child from this course component.**
- **Parent information nights to meet the teachers and ongoing chances for parents to review learning resources and teaching concepts are strongly recommended.**
- **Schools will provide alternative learning experiences for those students who have been exempted from human sexuality instruction by their parents.**

For additional information, contact the Curriculum Standards Branch.

HIV/AIDS in Educational Settings

The Information Bulletin on Acquired Immunodeficiency Syndrome in Educational Settings is intended to provide information and advice to school boards and regional health authorities in meeting their joint responsibility to provide educational programming to all eligible children and to protect the general public from communicable diseases.

Guidelines

HIV/AIDS is covered under the Communicable Diseases Regulation of the *Alberta Public Health Act* and there is no legal basis on which to prevent children infected with HIV from attending school.

A mechanism for ongoing communication between school boards and regional health authorities should be established. School jurisdictions, with the assistance of local public health personnel, should develop policies consistent with provincial guidelines regarding HIV/AIDS and other infectious diseases. Such policies should be reviewed regularly by school boards and local health authorities, and regular communication should be maintained on all health matters.

For the complete text of the bulletin, consult the *Alberta Education Policy, Regulations and Forms Manual*. Additional information on HIV/AIDS or other health related matters is available from local health authorities located throughout the province.

Regulations Introduction

The following sections provide a synopsis of those regulations that are relevant to the operation of school programs. For the complete regulations, refer to the *Alberta Education Policy, Regulations and Forms Manual*. The sections of the *School Act* to which these regulations refer, and the regulation numbers, are noted.

**Early
Childhood
Services**
Section 24(3)
Alta. Reg. 35/89
Amended A.R. 391/93

This regulation sets out the requirements for the operation of early childhood services programs and includes information on safety standards, programs, policies, record keeping, financial reporting and insurance.

**French
Language
Immersion**
Section 6(2)
Alta. Reg. 36/89

This regulation allows a local school board to authorize a French language immersion program by passing a resolution and informing the Minister in writing.

This program is for students who wish to learn French as a second language. The program does not meet the full requirements of students whose parents have section 23 *Charter* rights.

**Home
Education**
Section 23(3)
Alta. Reg. 283/94

This regulation replaces the former Home Education Program regulation. It recognizes a parent's right to choose a home education program, provided the program meets the requirements of the regulation and is under the supervision of a board or an accredited private school.

The regulation provides parents with the following alternatives in regard to supervision. They may notify their resident board of their desire to educate their child at home, or they may contact a "willing nonresident board" or an accredited private school for supervision and notify their resident board.

**Language of
Instruction**
Section 5(2)

This regulation, still under development, addresses the right to a French language education in accordance with section 23 of the *Canadian Charter of Rights and Freedoms*.

**Languages
Other than
English or
French**
Section 6(2)
Alta. Reg. 38/89

This regulation allows a local school board to authorize, by resolution, a program that offers instruction in a language other than English or French, by informing the Minister in writing.

A board shall ensure that English is used as the language of instruction for not less than 50 per cent of each school day for each student or an equivalent amount of time in a semestered program.

A board may offer a third language course, provided that English is used for not less than 35 per cent of each day or an equivalent amount of time in a semestered program.

Section 74(2) of the *School Act* allows a school board to employ a competent individual to teach a language or culture under the supervision of a certificated teacher.

**Practice Review
of Teachers**
Section 25(3)(a)
Section 75.1
Alta. Reg. 153/87
Amended A.R. 209/90
Amended A.R. 279/93

This regulation provides an orderly process by which complaints about the unskilled or incompetent teaching practices of a teacher can be investigated and acted upon. The regulation includes a process for initiating complaints and conducting investigations, hearings and appeals.

Private Schools

Section 22(6)

Alta. Reg. 39/89

Section 22(1) and (2) set out the requirements for registered and accredited private schools.

The regulation addresses the application for registration and accreditation; the additional records to be kept by private schools; rules for discipline, suspension and expulsion; required notices; school policies; required insurance; and financial reporting provisions.

This regulation also requires private schools, among other obligations, to complete a School Program Plan form; keep student records; and make rules for discipline, suspension and expulsion.

Student**Evaluation**

Section 25(3)(c)

Alta. Reg. 40/89

This regulation describes how provincial tests, examinations or other methods of evaluating a student's achievement are conducted. It provides for a directive to be issued outlining Alberta Education's administrative and procedural requirements for evaluating students.

The regulation also covers: security of evaluation materials; student conduct resulting in eviction or invalidation, and related objection and appeal procedures; review of evaluation results and an appeal process; and ministerial use of evaluation results.

Student Record

Section 18(8)

Alta. Reg. 213/89

Amended A.R. 175/93

This regulation itemizes what the student record, established and maintained by the school board, shall and shall not contain, and states the length of time a record must be retained. It also deals with persons who have access to the record and what happens when a student transfers to another school.

Instructional Delivery

Alberta Distance Learning Centre

The Alberta Distance Learning Centre (ADLC) can enhance local educational programs by providing instruction to students for whom classroom instruction cannot be provided in the subjects desired.

Registration and Fees

Students under 16 years of age who are attending a school operated by a school board must obtain the approval of the superintendent, principal or designate, before registering in Alberta Distance Learning Centre courses. Students age 16 and over who enroll directly in Alberta Distance Learning Centre courses are responsible for paying their own registration fees.

Registration fees for students who are directed to enroll in Alberta Distance Learning Centre courses are the school board's responsibility. This applies to students of all ages.

Students who are living in unorganized territories or who temporarily reside outside of Alberta may apply directly to the Alberta Distance Learning Centre. Alberta Education will assume the registration fees for Alberta students who are under 19 years of age and living in unorganized territories.

Students younger than 19 years of age who are not enrolled in a school operated by a school board may enroll in Alberta Distance Learning Centre courses through home education. Students are advised to contact their resident school board or a willing non-resident board or an accredited private school about home education. Registration fees for these students are the supervising school board's or private school's responsibility.

Application forms are enclosed in the *Alberta Distance Learning Centre Grades 10–12 Classroom Handbook* and the *Alberta Distance Learning Centre: Grades 1–9, Elementary/Junior High Handbook* received by schools at the beginning of each school year. Additional application forms are available upon request.

Students who wish to register should complete an application form to be mailed to the Alberta Distance Learning Centre. Students may also register in person at the Alberta Distance Learning Centre in Barrhead or at the Edmonton Study Centre.

Further information about the services, registration procedures and fees is available from the Student Services Department, Alberta Distance Learning Centre.

Additional Local School Authority Responsibilities

The principal, counsellor, superintendent or designate should help the student select suitable courses, obtain the required textbooks and other materials, establish timetable periods for distance learning study and arrange for writing final tests.

Courses and Programs

The elementary and junior high school programs and courses offered are outlined in the annual *Alberta Distance Learning Centre: Grades 1–9, Elementary/Junior High Handbook*.

Elementary School

GRADE 1 TO GRADE 3

Language Arts
Mathematics
Social Studies/Science

GRADE 4 TO GRADE 6

Language Arts
Mathematics
Science
Social Studies

Junior High School

GRADE 7 TO GRADE 9 CORE

Health and Personal Life Skills
Language Arts
Mathematics
Science
Social Studies

GRADE 7 TO GRADE 9 COMPLEMENTARY

Agriculture: Land and Life
Art
Environmental and Outdoor Education
Ethics
French as a Second Language
German as a Second Language
Ukrainian as a Second Language

Senior High School

A wide range of courses is offered in Grade 10 through Grade 12. Consult the *Alberta Distance Learning Centre: Grades 10–12, Classroom Handbook* published annually.

Further information about the services and course materials is available from the Student Services Department, Alberta Distance Learning Centre.

Home Education [through the Alberta Distance Learning Centre]

Parents or guardians who wish to provide their children with a home education program, using Alberta Distance Learning Centre courses, are to do so under the supervision of their resident board, a willing nonresident board or an accredited private school. The supervising board or private school approving a home education program is responsible for the Alberta Distance Learning Centre fees for home education students. Alberta Education provides additional funding to the supervising board or private school for home education students who are using Alberta Distance Learning Centre courses.

Monitoring Student Progress

For students who are attending school but working from ADLC materials, the Alberta Distance Learning Centre will send monthly status reports on student progress to the principal.

Student Learning Resources
[for Alberta Distance
Learning Centre Courses]

The Alberta Distance Learning Centre sells textbooks to students registering for a course. Consult the *Alberta Distance Learning Centre: Grades 10–12, Classroom Handbook* for prices. Students attending a school may purchase the required textbooks from the Alberta Distance Learning Centre or borrow books from their local school authority.

Out-of-print textbooks, identified in the handbook by a double asterisk, may be borrowed by a student registered in a course, provided the student submits a refundable deposit.

The Distance Education Program involves a variety of nonprint materials that are integral to the program package, such as computer software, laboratory kits, audiotapes and videotapes. These resources are available to registered students from the Alberta Distance Learning Centre. Consult the *Alberta Distance Learning Centre: Grades 10–12, Classroom Handbook* and the Learning Resources Distributing Centre *Buyers Guide* or its electronic inquiry/ordering system for availability and cost of learning resources.

Some videotapes are available from the regional and urban film centres or from ACCESS: The Education Station, or schools can acquire software, filmstrips and videotapes directly from the supplier. In other instances, registered students obtain these learning resources as part of the distance education package.

Those who do not wish to register with the Alberta Distance Learning Centre, but wish to purchase some of their materials, may do so by mail, from the Learning Resources Distributing Centre.

Further information about the services and course materials is available from the Student Services Department, Alberta Distance Learning Centre.

**Distance
Education
Technology**

Alberta Education encourages the use of technology to facilitate access to equitable educational opportunities for all students, regardless of location. Through the use of distance education technologies; e.g., facsimile, telephone and audio conferencing, computers and instructional television/videos, students in small schools have access to many of the same courses as urban students in large schools.

Inquiries in regard to distance education programs should be directed to the Alberta Distance Learning Centre. Inquiries for material should be directed to the Learning Resources Distributing Centre.

Educational Information Exchange

The Educational Information Exchange (EIE) collects, maintains and distributes basic data on all Alberta students, ECS to Grade 12. Student registration data is collected twice each year on September 30 and March 1. For further information, contact the Educational Information Exchange.

Native Education

Native people throughout the province have indicated that they want their children to complete regular school requirements and achieve the same standards set for all students.

To support the learning of Native students, schools are encouraged to use learning resources that give attention to Native heritage perspectives. Basic and other classroom resources (print and video), as well as a teacher resource catalogue and Native language programs, have been developed by the Native Education Project.

Alberta Education's policy on Native education states that all students in Alberta should understand and be aware of Native cultures, lifestyles and heritage. Native issues and culture may be explored in social studies, art, drama, science and other areas of the curriculum. Students, teachers and administrators may also explore Native issues in Alberta through a locally developed and/or authorized Native studies course. *Native Education in Alberta's Schools: Policy Statement on Native Education in Alberta*, 1987, is available free from the Native Education Project.

Both provincially authorized and locally authorized Blackfoot and Cree language and culture courses are offered in the province. More information on these courses is available from the Curriculum Standards Branch.

For further information, refer to the *Alberta Education Policy, Regulations and Forms Manual*.

School Library Program

Students in Alberta schools should have access to an effective school library program that is integrated with instructional programs. Such programs improve student opportunities for achieving a basic education as outlined in the Mission, Mandate, Principles and Beliefs section of this handbook.

In an integrated school library program, the services and activities are not peripheral or supplementary to the school's instructional program; they are an essential and dynamic part of it. The integrated library program widens, deepens and personalizes learning by involving students in the planned and purposeful use of resources. The resources are designed to

help students expand their ability to find, generate, evaluate and apply information. These information skills will, in turn, prepare students to function effectively as individuals and as full participants in society.

Student learning experiences should integrate information retrieval and research skills. These skills are best learned within the curriculum. To promote integration, opportunities for cooperative planning between teachers and teacher-librarians should be provided.

An integrated school library program attends not only to its formal instructional role, but also to its function as a centre for informal learning. As a resource centre, the school library should be a place where students can pursue their individual educational interests.

For additional information, refer to *Focus on Learning: An Integrated Program Model for Alberta School Libraries*, 1985; *Focus on Research: A Guide to Developing Students' Research Skills*, 1990; and the *Alberta Education Policy, Regulations and Forms Manual*.

Use of Human Tissue and Fluid in Educational Programs

Alberta Education firmly believes that the safety and well-being of students, teachers and other school staff must be a first consideration in the selection of materials for study. Therefore, all activities involving the extraction and analysis of samples of human fluid or tissue are prohibited in Alberta schools. Information regarding this topic is provided in *Clarification of Statements Prohibiting the Use of Human Body Substances in the Alberta Science Curriculum*, 1988.

Student Achievement

ECS to Grade 9

Purpose of Assessment

A comprehensive assessment program provides relevant data for all important educational decisions related to learning, instruction, program improvement and public accountability.

The assessment of student progress in relation to the expectations outlined in the programs of study is important for the following reasons.

- The information on student progress is essential so that teachers can change or refine instructional plans to ensure learning activities are appropriate for all students.
- The information is required for reporting student progress clearly to students, parents and others.
- The information is used in decisions regarding student placement.
- The information is required for evaluations of program effectiveness and for revision of programs to improve student learning.

Assessment as a Guide for Learning and Instruction

The assessment of student progress serves as a guide for learning and instruction. Knowledge about each student's current level of achievement is essential for matching learning activities to learning needs.

This information should be collected in a variety of ways to provide feedback that is useful to student and teacher alike. To be most useful, the assessment process should have the following characteristics.

- It should be part of instruction, with the methods and instruments varied, and done in a variety of contexts.
- It should be an ongoing process rather than a set of isolated events.
- It should focus on a broad range of abilities, reflecting multiple dimensions of skill development.
- The measures should be appropriate to the children's development and cultural background.
- It should be constructive. It should focus on what the children can do, and not on what they cannot do. It looks for children's strengths and through that encourages further learning by creating a positive atmosphere and positive self-images.
- It should involve children in their own assessment. This gives them responsibility for their own learning and fosters lifelong learning.

Diagnostic Approaches

The terms diagnostic instruction and diagnostic teaching cycle are often used to refer to instruction that is closely linked to assessment. Diagnostic instruction provides a means to ensure that learning difficulties are recognized early and that students receive the help they need. It also provides a means of confirming student learning so that more challenging activities can be provided as students become ready.

Diagnostic approaches to instruction are especially useful in the key areas of language arts and mathematics. To assist teachers in applying diagnostic techniques to these program areas, Alberta Education has developed the following service materials.

- *Diagnostic Reading Program* (Grade 1 to Grade 6)
Resource materials include assessment instruments and descriptions of evaluation and instructional strategies.
- *Diagnostic Mathematics Program* (Grade 1 to Grade 6)
Resource materials provide guidance in the use of manipulatives, individual interviews and small group activities. The activities serve as a basis for both evaluation and instruction.

-
- *Evaluating Students' Learning and Communication Processes* (Grade 7 to Grade 10)

Resource materials provide a strategy for evaluating student skills in six communication processes: exploring, narrating, imagining, empathizing, abstracting and monitoring. To demonstrate these processes, diagnostic teaching units have been developed in language arts (Grade 7), social studies (Grade 7, Grade 8 and Grade 9), and science (Grade 7 and Science 14).

Assessment as the Basis for Communicating Individual Student Achievement^①

When students are placed in age appropriate groups for instruction, parents can become confused about the distinction between the grade in which their child is placed (the instructional group) and the grade level of the various subject areas at which their child is actually working; e.g., the child is placed in a Grade 4 class but is working at approximately the Grade 3 level in language arts. Where such confusion exists, parents can misinterpret information regarding their child's progress. They may think that indications of satisfactory progress are made with reference to the instructional group the child is in rather than to the actual grade level at which the child is working. The policy on Assessment as the Basis for Communicating Individual Student Achievement is intended to reduce this type of confusion and to support the professional responsibilities of teachers to provide clear communication in describing student progress.

Teachers shall ensure that parents are fully informed about:

- what their child knows and can do in the programs she or he is studying
- how well their child is doing in those programs
- the grade level(s) the child has achieved in relation to the grade levels of the provincial programs of study for language arts, mathematics, science and social studies.

The policy does not restrict the communicating of achievement to written reports, nor does it require schools to use a particular type of instructional grouping or placement policy.

^① This also applies to students on home education programs.

Teachers should communicate the grade levels at which they judge a student to be working, in at least the four specified subject areas of the curriculum. The basis for their professional judgement in these matters also needs to be clear so that parents can readily understand how student learning has been assessed.

Principals determine how to implement this policy, in consultation with teachers, parents and school councils and in a manner consistent with any related school jurisdiction policies. The communication can take place in a wide variety of ways, including parent-teacher conferences, assessment portfolios, report cards or student work samples. An individual program plan (IPP) is a method often used by teachers when there is a large gap of several grades between a student's level of achievement and that student's grade placement. Whatever methods are chosen for implementing this policy, often face-to-face methods are the most successful for achieving clear and open communications.

All of the assessment information should be shared, not only with parents, but also with students when it is in the students' best interest to do so. Communicating with students about their levels of achievement is particularly important when students are planning their future courses and making program choices.

To assist teachers in assessing student achievement in relation to provincial standards, Alberta Education has developed classroom assessment materials for teachers' discretionary use in language arts, mathematics, science and social studies in Grades 1, 2, 4, 5, 7 and 8. These materials are available for purchase from the Learning Resources Distributing Centre.

Assessment for Program Evaluation

In addition to providing the basis for evaluating individual student progress, the standards of the curriculum provide a framework for evaluating program effectiveness. The collective gain of students along each strand of the program can signal the degree of effectiveness of the learning activities, learning resources and instructional approaches being used.

Schools need to use a variety of tools for gathering data useful in program evaluation. The provincial Achievement Testing Program can provide some useful information regarding student achievement.

Provincial Achievement Testing Program

The provincial Achievement Testing Program provides Alberta Education, local school authorities, schools and the public with information significant at the provincial and local levels about what students know and can do in relation to provincial standards. Annual assessments are conducted at Grade 3, Grade 6 and Grade 9. The results are reported to schools and jurisdictions near the end of August to assist school staff in planning instructional programs.

At Grade 3, assessments are in English language arts and mathematics. Both English and French versions are available for mathematics.

At Grade 6 and Grade 9, the assessments are in English language arts, French language arts, mathematics, science and social studies. French translations of the mathematics, science and social studies tests are available.

The schedule for administering achievement tests is communicated to schools in the fall of each year. It allows for some flexibility in determining testing times locally.

For further information on provincial achievement testing, refer to the following bulletins, which are sent to all schools and are available free from the Student Evaluation Branch:

- *Information Bulletin* for each test in Grade 3, Grade 6 and Grade 9
- *Achievement Testing Program, General Information Bulletin* for test administration
- *Parent Guide to Provincial Achievement Testing* for Grade 3, Grade 6 and Grade 9.

Senior High School Graduation Requirements

Introduction

Students who entered Grade 10 in the 1994–1995 school year, and who enter Grade 10 in subsequent school years, are eligible to receive only the Alberta High School Diploma, the High School Equivalency Diploma or the Certificate of Achievement upon completion of graduation requirements.

Until the end of the 1996–1997 school year, Alberta Education will continue to issue four types of high school diplomas, plus a certificate: the new Alberta High School Diploma, the General High School Diploma, the Advanced High School Diploma, the High School Equivalency Diploma, plus the Certificate of Achievement for students enrolled in the Integrated Occupational Program.

The General High School Diploma and the Advanced High School Diploma are to be phased out by August 1997. These diplomas are available only to those students who entered Grade 10 prior to the 1994–1995 school year. Students who qualify for an Advanced High School Diploma may also receive an Award of Excellence.

The diplomas and certificate certify that the holder has successfully completed a prescribed program of instruction. However, possession of an Alberta high school diploma or certificate does not necessarily guarantee admission to a post-secondary institution. Students should be advised to check the calendars of post-secondary institutions for admission requirements.

The graduation requirements for students who entered Grade 10 in the 1989–1990 school year through to the 1993–1994 school year, can be found in Appendix 5.

The Alberta High School Diploma graduation requirements follow in this section.

The Certificate of Achievement requirements, outlining the specific eligible courses and credits required to achieve the certificate, follow in this section.

The High School Equivalency Diploma requirements can be found in the Special Provisions section of this handbook.

Credit Requirements for Graduation

Students in any diploma route may wish to obtain credits in diploma examination courses other than those required for graduation. To obtain credits in these courses, **students shall write the appropriate diploma examination** regardless of which graduation credential they wish to receive.

Alberta High School Diploma Graduation Requirements

For Students Who
Entered Grade 10
in the 1994–1995
and Subsequent
School Years

Students who entered Grade 10 in the 1994–1995 school year, and who enter Grade 10 in subsequent school years, are eligible to receive only the Alberta High School Diploma upon completion of the following graduation requirements. For additional details, consult the information booklet *Alberta High School Graduation Requirements*, April 1993, available free from the Curriculum Standards Branch.

To attain an Alberta High School Diploma, a student must:

- earn a minimum of 100 credits
- complete and meet the standards of the following courses:
 - English Language Arts 30 or 33 or Français 30 or 33^①
 - Social Studies 30 or 33
 - Mathematics 20 or 23 or 24^②
 - Science 20 or 24 or Biology 20 or Chemistry 20 or Physics 20^③

Note: Successful completion of a diploma examination is required for English Language Arts 30 or 33 or Français 30 and Social Studies 30 or 33.

Note: For those taking Mathematics 30, Mathematics 33 and 30-level science courses, successful completion of a diploma examination is required. However, successful completion of these courses is not a condition of Alberta High School Diploma graduation requirements.

- complete and meet the standards of the following:
 - Physical Education 10 (3 credits)
 - Career and Life Management (CALM) 20 (3 credits)
 - 10 credits, in any combination, from:
 - career and technology studies (CTS)
 - OR
 - fine arts or second languages^④
 - OR
 - locally developed/acquired and authorized courses in CTS, fine arts or second languages
- earn, in addition to English Language Arts 30 or 33 and Social Studies 30 or 33^⑤:
 - 10 credits in any 30-level courses, including:
 - locally developed/acquired and authorized courses
 - 6000 series courses (advanced level) in career and technology studies
 - 35-level work experience

① Students in francophone programs may present Français 30 or 33 to meet their language arts diploma requirement. However, they must also present English Language Arts 30 or 33. These students can use English Language Arts 10–20–30 or 13–23–33 to fulfill the 10-credit diploma requirement from any combination of courses in the areas of second languages, career and technology studies (CTS), fine arts or locally developed/acquired and authorized courses.

② The mathematics requirement—Mathematics 20 or 23 or 24—may also be met with any 10-credit combination of mathematics courses that includes either Mathematics 13 or Mathematics 10; e.g., Mathematics 10 and Mathematics 14.

③ The science requirement—Science 20 or 24 or Biology 20 or Chemistry 20 or Physics 20—may also be met with any 10-credit combination of science courses that includes Science 10; e.g., Science 10 and Science 14. Agriculture 10–20–30 cannot be used to meet the science requirement.

④ IOP students who wish to transfer to an Alberta High School Diploma route after completing a Certificate of Achievement must meet the requirements outlined in the box above. One 36-level course (10 credits) from any occupational cluster is acceptable for students transferring from the Integrated Occupational Program to the Alberta High School Diploma Program in order to meet the 10-credit requirement in any 30-level courses.

Certificate of Achievement

To qualify for a Certificate of Achievement, Integrated Occupational Program students must earn a minimum of 80 credits, 67 of which are to be specified credits as follows:

Subject	Minimum Credits	Minimum Course(s)	Eligible Courses and Credits ^①
English Language Arts ^②	9	3	Eng Lang Arts 16(3) 26(3) 36(3) OR Eng Lang Arts 16(3) 26(3) 23(5) OR Eng Lang Arts 16(3) 23(5)
Social Studies	6	2	Social Studies 16(3) 26(3) OR Social Studies 13(5) OR Social Studies 16(3) 23(5)
Mathematics	3	1	Mathematics 16(3) OR Mathematics 14(5)
Science	3	1	Science 16(3) OR Science 14(5)
Physical Education	3	1	Physical Education 10(3,4,5)
Career and Life Management	3	1	CALM 20(3,4,5)
Core Courses	27 ^③		
Courses selected from the Occupational Clusters ^①	40	2	Occupational Courses 16 level – recommended minimum of 10 credits
• Agribusiness		2	26 level – recommended minimum of 20 credits
• Business and Office Operations			
• Construction and Fabrication		1	36 level – required minimum of 10 credits
• Creative Arts			
• Natural Resources			
• Personal and Public Services			
• Tourism and Hospitality			
• Transportation			
67 Specified Credits ^③		13 Unspecified Credits ^③	

① Credits are indicated in parentheses.

② To be considered for a Certificate of Achievement, a student must successfully complete the English requirements.

③ Minimum credits may vary depending upon the Eligible Courses and Credits options chosen.

④ One 36-level course (10 credits) from any occupational cluster is acceptable for students transferring from the Integrated Occupational Program to the Alberta High School Diploma Program in order to meet the 10-credit requirement in any 30-level courses.

Student Placement and Promotion

Placements and Promotions

Promotion of students from one grade to another is determined by the school principal, subject to policies of the local school authority and to provisions in this handbook.

Placement of students within senior high school is determined by the principal of the senior high school, subject to the policies of the local school authority and to the provisions in this handbook.

Grade 10 Students

For the purpose of determining a student's graduation requirements, the following will apply: upon promotion from Grade 9, and subsequent placement in Grade 10 in the next school year, the student's Grade 10 year is the school year in which the student receives the first mark (between 0% and 100%) in a senior high school course, as reported to Alberta Education, or the student was registered, prior to the 1994–1995 school year, in the noncredit English as a Second Language 10a course. As of the 1994–1995 school year, English as a Second Language 10a became a 5-credit course. Also see under Special Provisions, for information regarding mature students who entered senior high school in, or before, the 1983–1984 school year.

**Senior High
School Courses
and Credits for
Junior High
School Students**

Secondary education programs recognize and accommodate the wide range of developmental needs and abilities that exists among students.

The opportunity to take senior high school courses for diploma credits during a junior high school's regular instructional day may be offered as a privilege to an eligible student, as identified by the principal of a junior high school.

An eligible student is one who, in the opinion of the junior high school principal, has satisfied the general and specific learner expectations of each core course of the junior high school program to the extent of his or her estimated potential, has achieved acceptably in all enrolled complementary courses, and who shows special interest and signs of high potential in subject areas that are part of a senior high school graduation program.

A student may be offered an opportunity to take one or more senior high school courses at the junior high school or by attending a senior high school part time.

The privilege to enroll in a senior high school course(s) is at the discretion of the junior high school principal. A decision to extend this privilege to a student follows appropriate consultation with and approval of a parent or guardian and the senior high school principal.

The opportunity to access advanced level instruction applies to those course sequences that are continuous with junior high school programs and that extend beyond the challenges of Grade 9 courses.

The following are examples of course sequences that meet this criteria:

- English Language Arts 10–20–30
- Français 10–20–30
- French Language Arts 10–20–30
- French as a Second Language 31a–31b–31c
- Mathematics 10–20–30
- Science 10–20–30
- Social Studies 10–20–30.

Where senior high school courses are offered at the junior high school level, the planning for such courses should be based on collaboration between the junior high school and the receiving senior high school. Junior high school teachers challenging students with senior high school courses should consult with senior high school teachers to establish procedures that ensure consistency in implementing course outcomes and assessment standards.

Schools offering senior high school courses to junior high school students shall ensure that the approved programs of study for the senior high school courses are followed.

A junior high school student receives credits and marks for successfully completed senior high school courses. Upon promotion to Grade 10, the junior high school principal forwards the student's final marks to the principal of the receiving senior high school and concurrently to the Educational Information Exchange.

Exceptions

Course sequences excluded under this provision include French 13 and the "new" courses in French 10, 20 and 30. Courses from industrial education, business education, home economics and career and technology studies (CTS) are also excluded under this provision. However, junior high school students taking CTS modules will be recommended for credits, by the junior high school principal, upon entering senior high school. Also see the section on Senior High School Credits for Modules Completed in Junior High School.

Senior High School Credits for Post-secondary Courses

Post-secondary courses, taken at an institution either inside or outside Alberta, are not equated to credits for the Alberta High School Diploma, the General High School Diploma or the Advanced High School Diploma but may be evaluated for and applied toward the High School Equivalency Diploma.

Registration of Senior High School Students

In September and February of each school year, the Educational Information Exchange will provide the appropriate registration documents to each senior high school offering credit programs.

Evaluation of Out-of-province Educational Documents

Students entering an Alberta senior high school from outside Alberta should submit transcripts, or other official statements of previous standing, to the school they plan to attend. The principal is to evaluate these documents in relation to approved high school courses or designate unassigned credits. The principal will determine which year the student entered Grade 10. This assessment is to be based on the number of credits assigned and should take into consideration the best interests of the student. It establishes the specific requirements needed to obtain a high school diploma, as outlined in the Senior High School Graduation Requirements section.

The *Secondary Education in Canada: A Student Transfer Guide*, 6th Edition, 1991, authored by the Council of Ministers of Education, Canada, is designed to assist in the placement of students.

A list of reference materials, which may be purchased by schools, is available to assist principals in the evaluation of out-of-country documentation. Contact the Teacher Certification and Development Branch for information on publication names and addresses. Their evaluation staff can assist those principals who, following a review of the reference materials, require consultation.

An Alberta high school diploma is not to be issued solely on the basis of the evaluation of out-of-Alberta credentials. A student in this category who wishes to obtain an Alberta high school diploma is required to complete a minimum of 5 approved credits as prescribed by a school principal.

The required credits are to be completed in one or more of the subject areas specified under the diploma requirements, exclusive of physical education, and at a level equal to that of the highest Alberta course equivalent granted through credential evaluation.

A copy of the completed evaluation shall be forwarded to the Educational Information Exchange, for recording purposes. These evaluation forms may be obtained from Student Records, Educational Information Exchange.

In the case of a dispute over the number of high school credits to be awarded, which cannot be resolved at the level of the local school authority, the student has the right to appeal to the Special Cases Committee. This committee, which is the final procedural level in the appeal process, deals with all matters requiring the interpretation and application of policy relative to individual students.

Students planning to enter directly into a post-secondary institution in Alberta should submit their out-of-province documents to the post-secondary institution of their choice. There are no appeal procedures to Alberta Education in these instances.

A high school principal may appeal to the Special Cases Committee for special consideration on behalf of Canadian unilingual francophone students who enter the Alberta school system in their graduating year. For these students, the principal may recommend that Français 30 or 33 be accepted in lieu of English Language Arts 30 or 33 for Alberta High School Diploma, General High School Diploma or Advanced High School Diploma purposes.

The Special Cases Committee may be contacted by writing to the Executive Secretary, Special Cases Committee.

Visiting or Exchange Students

Visiting or exchange students from another province or country, who wish to complete a course for credit, should be registered with the Educational Information Exchange.

Any formal statement of academic achievement required by the school of origin would be issued by Alberta Education and would reflect only the courses the student actually completed in an Alberta school.

Visiting or exchange students seeking Alberta high school credits in a diploma examination course must write a diploma examination on the same terms as any Alberta student.

The English Language Arts 30 and English Language Arts 33 diploma examinations must be written in English and the Français 30 diploma examination must be written in French. The diploma examinations in Social Studies 30, Social Studies 33, Mathematics 30, Mathematics 33, Biology 30, Chemistry 30, Physics 30 and Science 30 must be written in either English or French.

Student Achievement in Senior High School Subjects

Introduction

A regulation governing the evaluation of students has been developed under section 25(3)(c) of the *School Act*. The regulation is summarized under Student Evaluation in the *Alberta Education Policy, Regulations and Forms Manual* section of this handbook. For specific details, refer to the manual itself.

The provincial student evaluation policy states that **each local school authority shall develop and implement a student evaluation policy.**

The current editions of the *General Information Bulletin: Diploma Examinations Program* and the *Annual Report: Diploma Examinations Program* can be consulted for an extensive discussion of student evaluation.

To assist teachers in assessing student achievement in relation to provincial standards, Alberta Education has developed classroom assessment materials for teachers' discretionary use in language arts, mathematics, science and social studies in Grades 10 and 11. These materials are available for purchase from the Learning Resources Distributing Centre.

Reporting Student Achievement in Senior High School Subjects

Alberta Education maintains an individual student record for every Alberta student. The record for a high school student is used to provide a complete and accurate reflection of the student's high school achievement, inclusive of courses reported as pass or fail.

Alberta Education records a course as completed, except for career and technology studies, if a mark of 0% to 100% is awarded and reported. Marks in CTS are recorded for modules where a student achieves a mark of 50% or greater. Achievement in all completed high school credit courses is to be reported to the Educational Information Exchange.

All school-awarded marks, 0% to 100%, shall be reported to the Educational Information Exchange in either diploma examination courses or nondiploma examination courses.

Marks shall be reported through the Non-diploma Examination Courses Form, Course Information Form, Diploma Examination School Marks Checklists, or by electronic transfer for approved users.

Schools or school boards wishing to adopt electronic reporting should contact the Educational Information Exchange.

Only one mark per course in any one semester will be accepted and added to a student's record. Consequently, principals and/or students must withdraw duplicate or multiple registrations in the same semester (reporting period) prior to the timelines established for marks reporting.

Once reported to Alberta Education, final marks in all completed courses, whether the course is passed or failed, shall not subsequently be deleted from the student's record. In those instances where a principal discovers an error has been made in reporting a course, credits or mark, the Educational Information Exchange will adjust the student's record upon receipt of written notification from the principal of the school in which the error occurred.

School-awarded marks in diploma examination courses shall be reported by the first day of the diploma examination schedule.

School-awarded marks in all nondiploma examination courses shall be reported using the Non-diploma Examination Courses Form, Course Information Form, or by electronic transfer, no later than two weeks following the completion of the respective diploma examination session or as otherwise specified by the Educational Information Exchange. For each course, the school will identify the course code, credits earned, semester, grading and language of instruction, if other than English. Schools will receive additional instructions, as required, throughout the year.

Reporting CTS Modules

Schools using electronic transfer are to report all marks in CTS courses to the Educational Information Exchange (EIE) except those marks of 0% to 24%. Failed CTS modules, those with a mark of 25% to 49% inclusive, are to be combined with other failed modules, where possible, and reported to the EIE who will advise the School Finance Branch for funding purposes. Failed modules will not appear on student records, nor will failed modules appear on student transcripts. Schools not yet using electronic data transfer should continue to report failed modules to the School Finance Branch. Challenged CTS modules are to be reported to the School Finance Branch as well as sending the mark to the EIE. Also see Appendix 7.

Grade 12 Validation Statement

Alberta Education attempts to confirm the accuracy of each student's high school record by issuing to each Grade 12 student, in the late fall of their Grade 12 year, a Student Record Validation Statement. This validation statement is produced from the Alberta Education student record. The statement shows the student's complete high school achievement record, at the time of issuance, and lists all courses completed, passed or failed. Principals are asked to confirm the accuracy of this record. **Any change in course information shall be authorized by the principal of the school in which the courses were completed. All forms are to be returned to the Educational Information Exchange within the time specified.**

Grade 12 Exemptions for Transfer-in Students

Out-of-province Grade 12 students who transfer into Alberta schools at the beginning of, or any time during, the school year should be exempted from Career and Life Management 20 and Physical Education 10. These students are still required to achieve the necessary minimum requirement of 100 credits to earn a high school diploma.

For the purpose of this exemption, a Grade 12 student is defined as one who is to graduate in the school year the student transfers into an Alberta school.

Notice of a student's exemption is to be reported by the principal, in writing, to the Educational Information Exchange, by April 30 prior to the student's anticipated graduation date.

Grade 12 Diploma Examinations Program

Students are required to write diploma examinations in the following courses:

Biology 30	Mathematics 33
Chemistry 30	Physics 30
English Language Arts 30	Science 30
English Language Arts 33	Social Studies 30
Français 30	Social Studies 33
Mathematics 30	

To obtain credit in a diploma examination course, students must write the appropriate diploma examination and obtain a final blended mark of 50% or higher, unless they have been exempted from writing the examination by the Director, Student Evaluation Branch. The final blended mark is the average of the school-awarded mark and the diploma examination mark. Diploma examinations are available in the French language for all diploma examination courses, except for English Language Arts 30 and English Language Arts 33. Students may elect to write either the French or English language version of the respective examination.

The diploma examinations program consists of course-specific examinations based on the *Program of Studies: Senior High Schools*. Administrators should refer to the annual publication *General Information Bulletin: Diploma Examinations Program* for complete information.

January and June Diploma Examinations

Examinations are written at all high schools offering the diploma examination courses. All students currently enrolled in diploma examination courses are to be registered for the examinations with the Educational Information Exchange by their high school principal.

Students not currently enrolled in a diploma examination course, but eligible to write, must register with the Student Evaluation Branch. Registration is achieved by completing a diploma examination application available through high school principals and the Regional Office Branch. The application form is to be forwarded to the Student Evaluation Branch by the due date, as published in the *General Information Bulletin: Diploma Examinations Program*.

August Diploma Examinations

August diploma examinations are written only at a number of selected centres throughout the province.

For the August administration only, students complete applications at the time of writing an examination.

Special writing centres outside Alberta are not authorized for the August diploma examination session.

November 1996 and April 1997 Diploma Examinations

Four more diploma examinations are being offered by Alberta Education: two in November 1996, English 30 and Mathematics 30; and two in April 1997, Biology 30 and Social Studies 30.

These diploma examinations are written only in designated writing centres throughout the province, and students are required to preregister with the Student Evaluation Branch.

Grade 12 Diploma Examinations Schedules

For information on diploma examinations schedules, consult the *General Information Bulletin: Diploma Examinations Program*, available from the Student Evaluation Branch.

Eligibility to Write

- Students currently enrolled in a diploma examination course are required to write the diploma examination in that course before credits are awarded.
 - Students who have been previously awarded credit for the course may write the diploma examination upon application.
 - Mature students, as defined in the Special Provisions section of this handbook, may write the diploma examination upon application, without taking regular instruction.
-

Special Provisions for Students with a Learning and/or Physical Disability

Students who have physical disabilities and/or have been assessed as having specific learning disabilities may require special provisions in order to write a diploma examination and may request:

- that an examination be provided in braille, in large print or on audiotape
 - that variation in writing time, place or mode of response be permitted
 - exemption from writing an examination
 - other adjustments, on request, and as approved by the Special Cases Committee.
-

Administrators are directed to the policies on *Special Examination Provisions for Students with a Learning Disability* and *Special Examination Provisions for Students with a Physical Disability*, listed in the *General Information Bulletin: Diploma Examinations Program*. **Application, together with the required documentation regarding students with special needs, shall be made by the school principal to the Student Evaluation Branch, as soon as possible and not later than 90 days before the first examination date.**

Special provisions are granted and applied for a specific examination administration. A renewed application for the special provisions must be requested, in writing, for any subsequent administration.

Students who write their examinations under special conditions will have their transcripts annotated with respect to the special provisions prevailing at the time of writing.

Special Circumstances

Under certain circumstances, the school-awarded mark may be accepted as the final mark upon application to and approval by the Special Cases Committee. See under the Special Provisions section and the Special Cases Committee section for further information.

Diploma Examination Results Statement

Following each examination period, each student will receive a Diploma Examination Results Statement. The statement shows the current diploma examination mark, the most recent school-awarded mark in the respective subject, and the subsequent blended mark to produce a final mark for each course.

For students who may have two or more school-awarded marks, or two or more diploma examination marks in the same course, the final mark for official transcript purposes only, is a blend of the highest school-awarded mark and the highest diploma examination mark achieved in the course within the current and previous two school years.

Each school will receive a summary of scores for students registered in that school for each diploma examination. Consult the *Annual Report: Diploma Examinations Program* for assistance in interpreting the scores.

Diploma Examination Bulletins

The following bulletins and reports are produced each year by the Student Evaluation Branch.

- *General Information Bulletin: Diploma Examinations Program.*
- *Annual Report: Diploma Examinations Program.*
- *Examiners' Reports* for English Language Arts 30, English Language Arts 33, Français 30, Social Studies 30, Social Studies 33, Mathematics 30, Mathematics 33, Biology 30, Chemistry 30, Physics 30 and Science 30.
- *Diploma Examinations Subject Bulletins* for English Language Arts 30/33, Français 30, Social Studies 30, Social Studies 33, Mathematics 30, Mathematics 33, Biology 30, Chemistry 30, Physics 30 and Science 30.

High School Diplomas, Certificates of Achievement and Transcripts

The Educational Information Exchange issues the Alberta High School Diploma, the General High School Diploma, the Advanced High School Diploma, the High School Equivalency Diploma or the Certificate of Achievement to students who meet the graduation requirements. A Statement of Courses and Marks, containing the entire high school record, accompanies the diploma or certificate and is available free to students and schools.

For a fee, students may request that an Alberta High School Transcript of Achievement be sent to themselves, an employer or a post-secondary institution. The transcript is produced from the student's Alberta Education student record. Courses deemed incomplete for any reason are not reported. Transcripts are annotated with regard to any special conditions that prevailed at the time of writing a diploma examination. It is the responsibility of the student to request an updated transcript when additional courses are completed following initial graduation, or as required.

Language Versions

Diplomas and transcripts are issued in the English language. Students requiring French language versions should make their requests through the Educational Information Exchange.

All students will receive a Statement of Courses and Marks in English only.

Appeal Procedures

School-awarded Course Marks

School principals should inform students of appeal procedures. A student who is dissatisfied with a school-awarded mark may:

- appeal under the policies set by the local school authority, or
- take the course again.

Changes to nondiploma examination course marks shall be received no later than October 31 of the current school year for marks originating in the previous school year.

Diploma Examination Marks

A student who is dissatisfied with a Grade 12 diploma examination mark may:

- request a rescore, in writing, to the Student Evaluation Branch, in accordance with the terms and date specified on the appropriate results statement
- rewrite the examination at a later administration date.

There is a fee for rewriting or rescoring a Grade 12 diploma examination. The fees are specified in the current edition of the *General Information Bulletin: Diploma Examinations Program*, available from the Student Evaluation Branch. If there is a mark increase of 5% or more on rescoring, the fee is refunded to the student.

The student will receive the result of the rescored examination as the final mark in that diploma examination, even if it is lower than the original mark.

Formal notifications of school mark changes in diploma examination courses shall be submitted to the Educational Information Exchange prior to dates published in the annual *General Information Bulletin: Diploma Examinations Program* for the release of results statements.

Requests to change diploma examination school-awarded course marks after the published dates shall be submitted to Data Exchange Services, Educational Information Exchange, for approval.

Provisions for Mature Students

Mature students may earn high school credits without holding the prerequisite courses. See the Special Provisions section for further information.

Credits for Private School Instruction

When a registered private school is approved as an accredited private school, students enrolled in the school prior to the change in classification may be awarded high school credits for courses successfully completed prior to the change of classification at the discretion of the principal of the accredited private school.

When a student transfers to a school operated by a public or separate school board or to an accredited private Alberta high school, from a registered Alberta private school or other nonaccredited school, the student may be awarded credits for previous instruction at the discretion of the public or separate school principal. In these instances, the student is responsible for providing the principal with a record of the final mark awarded and an outline of each course for which credits are being granted.

When credits for previous instruction are awarded, the principal shall enter a "P" or "pass", not a grade or percentage score, in the course mark column on the High School Evaluation Report.

Awarding Course Credits

Introduction

After each semester or school year, students shall be awarded credits on the recommendation of the principal, subject to complying with the following departmental requirements:

- instruction is provided by qualified teachers holding valid Alberta teaching certificates
- instructional time allocated to each subject meets minimum times specified by Alberta Education
- the content of each subject follows that outlined in the *Program of Studies: Senior High Schools* and/or course(s) approved by the Minister and/or by the local school authority
- the senior high school is operated in accordance with the *Guide to Education: ECS to Grade 12 Handbook*
- student evaluation is carried out in accordance with local school authority policy and is consistent with provincial policy
- school marks in diploma examination subjects and final marks in all other senior high school subjects are endorsed by the principal in accordance with local school authority policy. School marks are subsequently submitted to Alberta Education for recording, at a time and in a manner determined by the Minister.

Rules Governing Awarding of Credits

- **To earn the credits attached to all high school courses, a student shall achieve at least 50% ("C" standing) in each course.**
 - **Credits will not be granted for courses that a student has previously passed and been awarded credits. In the case of a student repeating a course, the higher mark will be recorded on the student's record and transcript.**
-

Number of Senior High School Credits in French and Other Languages

Senior high school students in Alberta are encouraged to take a wide range of courses. In keeping with this principle, no more than 25 credits may be presented in any one second language, including French, for senior high school diploma purposes. However, for purposes other than the senior high school diploma, such as preparation for the workplace, students may earn any number of credits in each second language, including French.

Course Sequence Transfer

The provision for course sequence transfer enables students to change course sequences, when necessary, to more appropriate levels of challenge. The recommended transfer routes for each program area are given under Transfer Points (Recommended) in the Information Regarding Various Courses and Programs section.

Students may transfer from a 13-23-33 sequence to a 10-20-30 sequence or from a 16-26-36 sequence to a 13-23-33 sequence or from a 16-26 sequence to a 14-24 sequence.

Students who transfer from a 10-20-30 sequence to a 13-23-33 sequence, or from a 13-23-33 sequence to a 14-24 sequence, should transfer into the sequence at the next grade level; e.g., from Mathematics 10 to Mathematics 23, or from Mathematics 13 to Mathematics 24. Students will not receive waived credits for the lower-level course in the new sequence. For example, students who successfully complete Mathematics 10 and then transfer to Mathematics 23 will not receive credits for Mathematics 13.

When a student transfers into a less challenging academic sequence, the principal may admit the student with less than a 50% standing. See Retroactive Credits following in this section.

Students who successfully complete the first course in a sequence, and then transfer to another sequence, and are waived to the highest level in that sequence, should receive credits for the middle course in the new sequence, upon successful completion of the highest level course. For example, students who successfully complete English Language Arts 10, then successfully complete English Language Arts 33 should receive waived credits for English Language Arts 23 and earned credits for English Language Arts 33.

Circumstances that should be considered when counselling a student to use the course sequence transfer provision include:

- language proficiency; as the student's language proficiency increases, a more academic sequence may provide a more appropriate level of challenge
- the school's ability to schedule the appropriate course route
- the student's ability and motivation.

The local school authority shall have a policy that states clearly the criteria to be met by a student who wishes to change program routes.

Prerequisite Standing

A student who has achieved a mark of 50% or higher in a given course shall be eligible to take the next or higher ranking high school course in that sequence. See Appendix 2.

Course Challenge

Course challenge is a provision that allows senior high school students to challenge the learner expectations of a course through a formal assessment process.

Course challenges are intended to:

- meet the diverse needs of students
- encourage students' ownership of their learning
- acknowledge the learning that students acquire in a variety of settings, not necessarily limited to schools.

Students challenging a course will be given a final course mark, except in diploma examination courses, and, if successful, credits in that course.

This policy applies to the non-diploma examination courses and only to the school-awarded mark component of diploma examination courses. Credit in diploma examination courses can be achieved only through combination of the school-awarded mark (50%) and the diploma examination mark (50%).

The course challenge process must assess a student's achievement of the depth and breadth of the learner outcomes for the course. Assessment procedures for course challenges shall include a variety of formats and strategies.

Any student who is registered in senior high school and who believes that he or she already possesses the knowledge, skills and attitudes prescribed by the program of studies for a course, shall be allowed to demonstrate these learnings through special assessment opportunities.

The procedures regarding course challenge are found in Course Challenge, Policy 1.9.1 of the *Alberta Education Policy, Regulations and Forms Manual*.

Exceptions

Since the course challenge policy applies only to students who believe they have the knowledge, skills and attitudes as defined by the program of studies for a given course, they would not be able to challenge courses that do not have specifically defined content in the program of studies. For example, the course challenge provision would not apply to such courses as work experience and special projects.

French 13 is also excluded from the course challenge provision.

Module Challenge in CTS

A senior high school student who has successfully completed a CTS module in junior high school, but has not been recommended to a senior high school principal for credits, may challenge the same module in senior high school. If successful, the student would be awarded the mark earned through the challenge and one credit for each module. Also, a senior high school student who believes he or she has the knowledge, skills and attitudes as defined in the program of studies for a particular module, but has not taken the module in junior high school, may challenge this module. See Reporting CTS Modules in the Student Achievement in Senior High School Subjects section of this handbook. Also see Appendix 7.

A module challenge can be handled in one or more of the following ways:

- a traditional comprehensive examination
- teacher observation over three to four classes
- teacher evaluation of student portfolio or work samples
- student demonstration of skills through performance of set tasks.

The waiver provision does not apply to CTS, and as such, the student would receive credits only for modules successfully challenged, regardless of level (introductory, intermediate or advanced). The student would not receive waived credits. Also see under Exceptions in the Waiver of Prerequisites and Credits for Waived Prerequisite Courses section.

Waiver of Prerequisites and Credits for Waived Prerequisite Courses

Prerequisites shown in Appendix 2 may be waived by the principal.

If the principal waives a prerequisite, the following conditions must be met:

- **the student possesses the knowledge, skills and attitudes identified in the waived course or program of studies**
- **judgements are made on an individual basis, not for an entire class of students**
- **it is in the student's best interest.**

For example:

- A student who is waived into English Language Arts 30, and successfully completes the course, will receive 5 earned course credits for English Language Arts 30 plus waived credits for English Language Arts 10 and English Language Arts 20, for a total of 15 credits.
- A student successfully completing English Language Arts 13–23–33 and English Language Arts 30 receives 20 credits. However, waived credits will not be granted for English Language Arts 10 and English Language Arts 20 because the student transferred from a lower-level course to a higher-level course sequence. The student was not waived into English Language Arts 30.

-
- A student who successfully completes English Language Arts 10, then earns credits for English Language Arts 33, should receive waived credits for English Language Arts 23.

Upon successful completion of the next or higher ranking course in a given sequence, the principal is to report, in writing, any waived course or courses to the Educational Information Exchange. Credits are then granted for the waived prerequisite course or courses, and a "P" or "pass" is recorded on the student's record and transcript.^① The credits awarded for each prerequisite course are the same as the number of credits achieved for the course completed, unless otherwise specified by the school.

When it is in the best interest of the student to receive both credits and a mark for a course (other than a "P" or "pass"), schools can use the flexibility now available through alternatives to the Carnegie Unit organizational model (see School Organization in the Senior High School Programming section) to provide the instruction necessary to complete the course requirements. The student may then be evaluated to determine a percentage mark.

Exceptions

The waiver provision outlined above does not apply to the following courses:

- CTS Courses (all)
- French 13
- Industrial Education Courses (all)
- Locally Developed/Acquired Complementary Courses (all)
- Physical Education 10
- Social Studies 10
- Social Studies 13
- Work Experience 15–25–35.

Career and Technology Studies (all courses)

Students may challenge modules in CTS. See the Course Challenge section in this handbook. The waiver provision does not apply to CTS, and as such, the student would receive credits only for modules successfully challenged, regardless of level (introductory, intermediate or advanced). The student would not receive waived credits.

① A "P" or "pass" mark is not taken into consideration in the calculation of averages for the Alexander Rutherford Scholarships for High School Achievement or for post-secondary entrance.

Retroactive Credits

The following applies to all regular students. See the criteria for mature students in the Special Provisions for Mature Students section.

Students not achieving at least 50% in a course may repeat the course or, subject to the approval of the school principal, take a course in an alternative sequence. **Students who successfully complete the next higher level course in an alternative sequence shall be granted credit for the prerequisite course.**

The following chart presents the only courses toward which retroactive credits may be applied.

COURSES ELIGIBLE FOR RETROACTIVE CREDITS^①

Registered Course Reported Failed Semester/School Year: A	Alternative Course Passed Semester/School Year: B	Alternative Retroactive Credits Semester/School Year: B
English Language Arts English Language Arts 10 English Language Arts 20 English Language Arts 13	English Language Arts 23 English Language Arts 33 English Language Arts 26	English Language Arts 13 English Language Arts 23 English Language Arts 16
French French Language Arts 10 French 31a	French 31a French 30 (new)	French 30, 20, 10 (new) French 20, 10 (new)
Mathematics Mathematics 10 Mathematics 10 Mathematics 13 Mathematics 20 Mathematics 14	Mathematics 23 Mathematics 24 Mathematics 24 Mathematics 33 Mathematics 26	Mathematics 13 Mathematics 14 Mathematics 14 Mathematics 23 Mathematics 16
Social Studies Social Studies 10 Social Studies 20 Social Studies 13	Social Studies 23 Social Studies 33 Social Studies 26	Social Studies 13 Social Studies 23 Social Studies 16
Science Science 10 Science 14	Science 24 (5 credits) Science 26	Science 14 Science 16
① The references to Semester/School Year "A" and Semester/School Year "B" are to emphasize that sequential registration and instruction are required.		

Courses for which retroactive credits have been granted will be recorded as "P" or "pass" on the student's record and transcript.

A student shall be awarded retroactive credits automatically by Alberta Education when all of the following criteria are met:

- The student is registered by the principal in an approved course and receives instruction in the course in Semester "A" or School Year "A".

-
- At the end of Semester "A" or School Year "A", the principal reports to the Educational Information Exchange, that the student has failed in the registered course. A mark of less than 50% must be reported to the Educational Information Exchange and recorded on the student's file in order for the student to be eligible for retroactive credits in the following years.
 - Pursuant to a specific local school authority promotion policy, the student is registered, by the principal, in the next higher level course in an alternative sequence in the following Semester "B" or School Year "B".
 - The principal subsequently submits to the Educational Information Exchange, in the appropriate reporting period for Semester "B" or School Year "B", a pass mark in the higher level alternative course completed.

Special Provisions

Special Provisions for Mature Students

Mature Student Status is granted effective September 1 for the subsequent school year. All the necessary criteria must be satisfied prior to September 1.

- **A mature student for Alberta High School Diploma, General High School Diploma or Advanced High School Diploma credit purposes is one who, as of September 1 of the current school year, is:**
 - **19 years of age or older; or**
 - **the holder of a previously-awarded high school diploma from the province of Alberta; or an equivalent high school diploma from a jurisdiction acceptable to the Minister.**
- **The privileges afforded by the granting of Mature Student Status are not applied retroactively to a student's completed course work on file with Alberta Education. The application of Mature Student Status is conditional upon the completion of new course work subsequent to September 1 of the school year in which the status becomes effective.**

-
- If a dispute or uncertainty as to whether or not a person qualifies for Mature Student Status still exists after all avenues of appeal have been explored at the jurisdictional or local school authority level, cases may be submitted, in writing, to the Executive Secretary, Special Cases Committee, Alberta Education.
 - **Mature students enrolled in credit courses must be registered with the Educational Information Exchange.**
 - **A mature student may earn senior high school credits after successfully completing:**
 - **courses offered in a regular accredited school**
 - **courses offered under extension programs**
 - **courses offered by the Alberta Distance Learning Centre**
 - **a diploma examination conducted by Alberta Education with or without formal course instruction.**
 - **A mature student is eligible to enroll in any course at the senior high school level or to write a diploma examination without holding the required prerequisite courses.**
 - **A mature student who has achieved a standing of 50% or higher in a senior high school course, by any of the alternatives noted above, will automatically be awarded credits by Alberta Education in the normal prerequisite(s) for the course(s) completed. The credits awarded for each prerequisite course will be the same as the number of credits achieved for the course completed unless otherwise specified by the school. However, a mature student who completes a lower-level sequence and transfers to the highest course in a higher-level sequence will receive credits only for the courses completed. For example, a mature student completing English Language Arts 13, 23, 33 and 30 will receive 20 credits. See Waiver of Prerequisites and Credits for Waived Prerequisite Courses, second example, in the Awarding Course Credits section of this handbook.**
 - **Mature students are eligible to receive the Alberta High School Diploma, or the General High School Diploma, or the Advanced High School Diploma, or the Certificate of Achievement upon completing the normal requirements. They are not, however, required to complete Physical Education 10 or Career and Life Management 20.**

Note: Many local school authorities offer comprehensive programs for mature students in both credit and noncredit areas. Interested mature students should consult their local school authority for details of such programs.

Mature students who enroll in high school courses may earn the Alberta High School Diploma under the current diploma requirements. Mature students who have not previously attended high school are expected to meet the current requirements, except for Physical Education 10 and Career and Life Management 20, to earn high school diplomas. Mature students who entered high school in the 1983–1984 school year, or before, may meet the current requirements for the Alberta High School Diploma or the 1983–1984 requirements, as follows. **For a mature student to meet this provision, the student must have had a mark reported to Alberta Education in, or before, the 1983–1984 school year.** Also see under Student Placement and Promotion, Grade 10 Students.

High School Diploma Requirements 1983–1984

A high school diploma is awarded to a student holding 100 credits, subject to the following requirements:

- Language Arts—a minimum of 15 credits, five of which must be in English Language Arts 10 or English Language Arts 13 and five in English Language Arts 30 or English Language Arts 33.
- Social Studies and Social Sciences—a minimum of 10 credits, five of which must be earned in Social Studies 10. A maximum of 18 credits may be earned in the social sciences options.
- Physical Education 10—a minimum of 2 credits.
- Mathematics—a minimum of 5 credits with a maximum of:
 - 10 credits in Grade 10
 - 15 credits in Grade 10 and 11 courses.
- Science—a minimum of 3 credits.
- Grade 12 courses—5 credits in English Language Arts 30 or English Language Arts 33, or English 36^① if completed prior to September 1974, plus a minimum of 10 credits in other subjects at this level.

Credits earned in other approved high school courses may be used to obtain the required 100 credits.

The principal will forward a letter to the Educational Information Exchange indicating which diploma requirements the student is eligible for. This information may be provided at any time during the school year.

① The English 36 course referred to here should not be confused with the Integrated Occupational Program English 36 course. There was no departmental examination for the English 36 course referenced here.

High School Equivalency Diploma

Alternative 1

There are two alternatives to achieving a High School Equivalency Diploma.

A person, 18 years or older as of September 1 of the current school year, who is deficient in the credits needed for an Alberta High School Diploma or a General High School Diploma, and who has been out of school for at least 10 consecutive months, and who wishes to obtain a High School Equivalency Diploma, should apply to the principal of the high school in the community. The principal will forward a letter to the Educational Information Exchange, indicating that the following requirements have been met. All necessary documents should be included with the letter.

The candidate shall obtain 100 school credits as set forth below:

- A minimum of 60 credits must be gained through classroom instruction in a school or other institution accredited by or acceptable to Alberta Education (for out-of-province students), offering approved senior high school courses, as follows:
 - a high school course in mathematics 5 credits
 - a high school course in science 3 credits
 - English Language Arts 30 or
English Language Arts 33 5 credits
 - one other 30-level course, other
than English Language Arts 5 credits
 - additional high school courses 42 credits
- A minimum of 40 additional credits, which must be earned as follows:
 - additional high school courses
 - additional approved adult education courses under recognized agencies; e.g., public colleges, institutes of technology, extension divisions of universities, adult evening classes**AND/OR**
 - a maximum of 15 credits for maturity, according to the following scale:
 - age 21–24 (inclusive) 5 credits
 - age 25–29 (inclusive) 10 credits
 - age 30 and over 15 credits
 - a maximum of 5 credits for extensive travel
 - a maximum of 5 credits for extensive reading or private study.

Alternative 2

A person, 18 years or older, who has been out of school for at least 10 consecutive months, who passes all five tests in the General Educational Development (GED) test battery with a minimum standard score of 45 or better, and meets the eligibility requirements, will be granted a High School Equivalency Diploma.

Further information regarding Alternative 1, Alternative 2 and the GED program may be obtained from the Student Evaluation Branch.

Special Cases Committee

Frame of Reference of the Committee

The committee deals with all matters that require the interpretation and application of policy relative to the programming for an individual student, as suggested under Functions of the Committee.

This committee is the final procedural level in the appeal process, other than the Minister of Education. All other avenues of appeal must be explored at the level of the local school authority before making application for appeal to this provincial body.

Membership of the Committee

The committee is chaired by the Director, Student Evaluation Branch and is comprised of four other directors of Alberta Education or their designates, as approved by the chair.

Functions of the Committee

Specific examples of matters dealt with by the committee include the following:

- determining the number of high school credits to be awarded to out-of-province students who have appealed the evaluation given by the school in Alberta
- ruling on whether or not students who have been expelled from school should be permitted to write diploma examinations
- ruling in instances of disputed evaluation or instances of disputed diploma requirements
- ruling on student evaluation or diploma requirement matters where no policy or precedent exists
- determining "mature student" status in individual cases
- reviewing cases where retroactive credits are in dispute
- determining the variations in practice that may be permitted in the writing of diploma examinations by students seeking an Alberta High School Diploma, a General High School Diploma or an Advanced High School Diploma.

**Directions for
Contacting the
Committee**

- **Students shall be informed of their right to appeal to the Special Cases Committee.**
- Teachers, principals, students or other individuals in the province, who have explored all avenues of appeal at their jurisdictional or local school authority level and feel they have a case requiring special consideration should apply, in writing, to the Executive Secretary, Special Cases Committee, Alberta Education. The written submission should provide reasons for the need to appeal and a rationale in support of the appeal.
- **Persons who appeal to the Special Cases Committee shall concurrently advise the principal of the school and the superintendent of the local school authority where the student received instruction.**
- **Upon receiving notice of the appeal, the principal shall submit a written report to the Special Cases Committee outlining recommendations related to the appeal.**

Resources & Services

RESOURCES AND SERVICES:

Learning Resources

Introduction

In terms of provincial policy, learning resources are those print, nonprint and electronic software materials used by teachers or students to facilitate teaching and learning. Many learning resources, publisher developed, Alberta Education developed, and teacher made, are available for use in implementing school programs. Decisions about the selection and use of resources are a local matter and should take into account student skill levels, interests, motivations and stages of development.

Alberta Education authorizes learning resources in three categories:

- basic student learning resources
- support student learning resources
- authorized teaching resources.

Authorization indicates that the resources meet high standards and can contribute to the attainment of the goals of the program. However, the authorization of resources does not require their use in program delivery.

Most basic and support student learning resources, and authorized teaching resources, are available for purchase from the Learning Resources Distributing Centre (LRDC).

Accessibility and availability information about all authorized learning resources is included in the Learning Resources Distributing Centre *Buyers Guide* or its electronic inquiry/ordering system.

**Learning Resources
Credit Allocation**

The learning resources credit allocation is applicable to all purchases from the Learning Resources Distributing Centre. The credit allocation is available through the Learning Resources Distributing Centre for eligible or approved Alberta school authorities for the purchase of any resource carried by the LRDC. Further information for the present allocation is provided in the Learning Resources Distributing Centre *Buyers Guide* as well as in the LRDC's School Information Package.

**Student
Learning
Resources**

Alberta Education approves student learning resources that fall into two categories: basic and support.

Basic student learning resources and most support student learning resources are available for purchase from the Learning Resources Distributing Centre.

**Basic Student
Learning
Resources**

Basic learning resources are those student learning resources authorized by Alberta Education as the most appropriate for addressing the majority of learner expectations of the course(s), substantial components of the course(s), or the most appropriate for meeting general learner expectations across two or more grades, subject areas or programs as outlined in provincial programs of study. Basic learning resources may include any resource format, such as print, computer software, manipulatives or video.

**Support Student
Learning
Resources**

Support learning resources are those student learning resources authorized by Alberta Education to assist in addressing some of the learner expectations of a course or components of a course; or to assist in meeting the learner expectations across two or more grades, subject areas or programs as outlined in the provincial programs of study. Support learning resources may include any resource format, such as print, computer software, manipulatives or video.

**Resource
Availability**

The stocking of authorized support student learning resources by the Learning Resources Distributing Centre is in accordance with the following policy: the LRDC carries such resources for at least one full fiscal year (April 1 to March 31) after authorization.

**Learning Resources
for the
Visually Impaired**
[Materials Resource
Centre]

The Materials Resource Centre for the Visually Impaired (MRC) provides alternative formats for curriculum materials, such as braille, large print and audiotape, as well as equipment and kits for visually impaired students in Alberta. For further information, contact the MRC Division of the Learning Resources Distributing Centre.

**Locally
Developed/
Acquired
Student
Learning
Resources**

A school board may develop or acquire instructional materials for use in programs or in schools under section 44(2)(a.1) subject to the provisions of section 25 of the *School Act*.

In developing/acquiring instructional materials, the school board should take into account such criteria as curriculum fit, criteria for promoting respect and understanding, appropriateness for student developmental stages and criteria for instructional design.

**Teacher Curriculum
Support
Resources**

The provision of curriculum support is a responsibility shared by local school authorities and Alberta Education. Materials and activities are designed to help teachers implement the course or program of studies. Support materials include print and nonprint items; support activities include orientation sessions and/or workshops.

Most curriculum support materials are available from the Learning Resources Distributing Centre at the current listed selling price.

A number of teacher inservice programs are available on video from ACCESS: The Education Station.

Information about curriculum support materials and activities is available from the Curriculum Standards Branch.

**Authorized
Teaching
Resources**

Authorized teaching resources are those teaching resources produced externally to Alberta Education and authorized by the Minister; e.g., resources produced by publishers, reviewed by Alberta Education, found to meet the review criteria, and to be the best available resources to support the implementation of courses/programs of study and the attainment of the goals of education. Teaching resources produced as service documents by Alberta Education, such as guides, diagnostic programs and monographs, are authorized by definition.

In exceptional circumstances, a teaching resource may be given basic status.

Learning Resources Distributing Centre *Buyers Guide*

The Learning Resources Distributing Centre *Buyers Guide*, its supplements, and its electronic inquiry/ordering system, provide a comprehensive list of all student and teaching resources authorized by Alberta Education for use in schools. The Learning Resources Distributing Centre carries most resources authorized by Alberta Education and provides access to all of them.

All products available from the Learning Resources Distributing Centre have a cost recovery selling price. In addition to a comprehensive General Information section, which provides ordering and business practices information, the *Buyers Guide*, its supplements, and its electronic inquiry/ordering system, provide a Publisher Index as well as the following types of information on each resource carried in stock:

- grade and subject of intended use
- authorization status
- language
- title
- publisher
- edition
- author
- year
- ISBN
- product order number
- selling price.

As well as the English language instruction edition, the *Buyers Guide* is also available in a French language instruction edition, *Enseignement en français*.

The Learning Resources Distributing Centre carries the following types of learning resources in stock:

- basic student learning resources, print and nonprint
- most support student learning resources, print and nonprint
- authorized teaching resources
- distance education print and some nonprint course materials
- English, French and other languages instructional materials
- Alberta Education legal and information/service publications
- programs of study
- preadministered Grade 12 diploma examinations
- some standardized test materials.

Alberta Education Directory

Alberta Education

Regional Office Branch

The Regional Office Branch works in cooperation with local school authorities to ensure the quality of teaching, programs and schools.

The Regional Office Branch provides several services. It responds to public requests for information and assistance. It supports parental choice by registering, accrediting and monitoring private schools; approving and monitoring ECS; and monitoring home education. The staff also participate in Ministerial reviews, investigations and tribunals. The branch helps to ensure an open and accountable education system through its review of school jurisdiction business plans and results reports.

Red Deer and north are served by:
Regional Office Branch, Edmonton
Telephone: 403-427-2952
Fax: 403-422-9682

Red Deer and south are served by:
Calgary Office of the Regional Office Branch
Telephone: 403-297-6353
Fax: 403-297-3842

Education Information Line
Telephone: 403-427-7219

Appendix 1

Articulation with Alberta Apprenticeship and Trade Certification

The following information is provided to help schools and students with plans for their high school career field programs as they relate to the *Alberta Apprenticeship and Industry Training Act, 1991*. Information relating to potential linkages with the career and technology studies strands/modules curriculum is described in the *Career and Technology Studies Manual for Administrators, Counsellors and Teachers, 1996* (Interim).

- Recognition of Alberta High School Vocational Subjects by the Institutes of Technology and Community Colleges

Advanced placement may be granted by an institution on the basis of proof of successful completion of a high school business or technical program and/or by obtaining a passing grade in an institution-administered entrance examination. To do so, arrangements must be made for individualized programs.

Students wishing to take advantage of these articulation provisions should write to the registrar of the institute of technology or community college by April 15, giving details of the high school program completed, or to be completed, and stating the post-secondary program in which they are interested. The institutions involved will communicate with students regarding specific information.

- Articulation with the Alberta Apprenticeship and Trade Certification

Some high school programs are similar to the junior periods of some apprenticeship programs. There are particular similarities between the following Alberta Education and Alberta Apprenticeship and Trade Certification programs:

Building Construction	Carpenter Apprenticeship
Electricity	Electrician Apprenticeship
Piping	Plumber Apprenticeship
	Steamfitter-Pipefitter Apprenticeship
Automotives	Motor Mechanic Apprenticeship
Auto Body	Auto Body Mechanic Apprenticeship
Sheet Metal	Sheet Metal Worker Apprenticeship
Machine Shop	Machinist Apprenticeship
Electronics	Electronic Technician Apprenticeship
	Communication Electrician Apprenticeship
Related Mechanics	Agriculture Mechanic Apprenticeship
Welding	Welder Apprenticeship
Food Preparation	Cook Apprenticeship
Beauty Culture/Cosmetology	Hairstylist Apprenticeship

A person who presents to apprenticeship authorities of the Apprenticeship and Trade Certification Branch, Alberta Advanced Education and Career Development at least 35 credits in one of the high school vocational programs (except beauty culture/cosmetology), and an acceptable application for apprenticeship in the corresponding apprenticeship program, may be granted apprenticeship credits on the following basis:

- For building construction, electricity, automotives, machine shop, electronics, plumbing and steamfitting—upon recommendation of the employer—twelve months of time credit (three months each of four twelve-month periods) and first and second period technical credit upon passing the examinations for these periods.
- For appliance servicing—upon recommendation of the employer—twelve months of time credit (four months each of three 1600 hour periods) and first period technical credit upon passing the examination.
- For electronics into the communication electrician apprenticeship—upon recommendation of the employer—credits arranged by evaluation of credentials. There are four “craft” areas in the apprenticeship program beyond the first period level.
- For welding and food preparation—upon recommendation of the employer—twelve months of time credit (four months each of three twelve-month periods) and first period technical credit upon passing the first period examination.
- For auto body—upon recommendation of the employer—one period of time credit (600 hours each of three 2100 hour periods) and first period technical credit upon passing the first period examination.
- For sheet metal—upon recommendation of the employer—one period of time credit (450 hours each of four 1800 hour periods) and first and second period technical credit upon passing the examination for these periods.
- For related mechanics—no accreditation arrangements.

- For hairstylist—accreditation arrangements:

- All students graduating with 55^① credits must find an employer willing to indenture them as apprentices. The application for apprenticeship will result in students receiving notice to appear for the theory examination and being informed they need to serve two^②, 700-hour^② periods of work experience before attempting the practical examination. When all requirements are met, the student will receive a Completion of Apprenticeship Certificate and a Journeyman Certificate.
- High school (vocational) students with fewer than 55^① credits, but more than 700^② hours of instruction from an approved school, will be required to find an employer and indenture as apprentices. Upon presentation of documented proof of the above, the student may receive technical credit for the first apprenticeship period. On the employer's recommendation, the student may attempt the first period examination. With an employer's recommendation, an apprentice may also be granted credit for the first period of apprenticeship, up to the maximum hours of time spent in school instruction.

Note: Applicants in this category may not attempt second period examinations.

Apprentices must attend second period apprenticeship training and complete 1400^② hours of work experience. Following this, apprentices may challenge the theory and practical examinations and, if successful, will receive a Completion of Apprenticeship Certificate and a Journeyman Certificate.

① Students must submit proof of successful completion of 55 or 35 credits in:

- Beauty Culture 12, 22 and 32 courses
OR
- the combination of Career and Technology Studies (CTS) Cosmetology Studies modules and other CTS modules specified in the chart that follows.

Note: Beauty Culture 12–22–32 courses will be replaced with the Cosmetology Studies modules and related CTS modules effective September 1997.

② The number of hours and periods of work experience needed to meet Completion of Apprenticeship and Journeyman requirements in the Hairstylist trade is currently under review by the Apprenticeship and Trade Certification Branch of Advanced Education and Career Development.

-
- Students receiving less than 700^② hours of instruction from an approved school must take both periods of apprenticeship technical training. However, with an employer's recommendation, an apprentice may be granted work experience for the first period up to the maximum hours of time spent in school instruction.

A person who presents fewer than 35^① credits in one of the articulated programs may expect to be considered for less apprenticeship credit, on the basis of individual performance, upon undertaking the apprenticeship.

Note: High school career field credits acceptable for articulation with apprenticeship programs may be altered from time to time, due to changes in programming recommended by provincial advisory committees.

① Students must submit proof of successful completion of 55 or 35 credits in:

- Beauty Culture 12, 22 and 32 courses
OR
- the combination of Career and Technology Studies (CTS) Cosmetology Studies modules and other CTS modules specified in the chart that follows.

Note: Beauty Culture 12–22–32 courses will be replaced with the Cosmetology Studies modules and related CTS modules effective September 1997.

② The number of hours and periods of work experience needed to meet Completion of Apprenticeship and Journeyman requirements in the Hairstylist trade is currently under review by the Apprenticeship and Trade Certification Branch of Advanced Education and Career Development.

Appendix 2

Provincially Authorized Senior High School Courses

Courses within each category are listed in the sequential numerical order of the course codes. Prerequisite courses are indicated by their linear arrangement across the page, or by the line symbol — used to indicate a prerequisite that leads to more than one course. Course credits are shown in parentheses.

Implementation years are noted in the table of contents of the *Program of Studies: Senior High Schools* and further documented in the footers of individual courses/programs of study.

(continued)

- ① These courses may not be used as substitutes for English Language Arts 20 or 23 for students who entered Grade 10 as of September 1988.
- ② Proficiency level determines entry point. The course codes become effective September 1, 1997 to reflect the change to levels of instruction in English as a Second Language. The old codes for English as a Second Language 10a, 10b and 10c (1116, 1117 and 1118) will become inactive as of September 1, 1997.

(continued)

① The course challenge and waiver prerequisite provisions do not apply to French 13.

② Provincial implementation for French 31c is in the 1996–1997 school year.

③ These course numberings refer to the six-year Ukrainian program approved in 1980.

④ Mathematics 30 is the corequisite for Mathematics 31.

⑤ These courses are to be replaced by career and technology studies strands/modules in the 1997–1998 school year.

⑥ See the Courses and Programs section for additional information.

⑦ The waiver prerequisite provision does not apply to Social Studies 10, Social Studies 13 or Physical Education 10.

^① Schools reporting credits in CTS courses should not be reporting credits in the practical arts (business education, home economics, industrial arts and vocational education). For example, credits are not to be reported for both financial management and accounting. Refer to Appendix 7 to determine which course code should be used when reporting student achievement to Alberta Education.

① Each course, at each level, may be offered for 3, 4, 5, 6, 7, 8, 9 or 10 credits. Beginning in the 1994–1995 school year, the maximum total that can be credited toward the 100-credit graduation requirement is 15 credits. The waiver prerequisite provision does not apply to work experience courses.

Appendix 3

Locally Developed/Acquired and Authorized Senior High School Only, Complementary Courses❶

The *Locally Developed/Acquired and Authorized Junior and Senior High School Complementary Courses* policy, and related procedures, can be found in the *Alberta Education Policy, Regulations and Forms Manual*.

Prior to submitting a course outline to the school authority for approval, the course outline will be forwarded to the Director, Curriculum Standards Branch for review regarding overlap with provincially authorized curriculum. The review documentation, along with the course outline, shall be filed with the school authority as it considers course approval.

School authorities shall then forward all completed authorizations and course outlines of credit courses (including second language courses) to the Director, Curriculum Standards Branch by May 31 for implementation in the first semester of the following school year, or by December 31 for implementation in the second semester of the same school year. Alberta Education will keep these on file and maintain a locally developed/acquired courses database.

All school authorities wishing to continue offering a locally authorized course shall reauthorize their locally developed/acquired courses or programs every three years. Reauthorizations do not require a review for overlap by the Curriculum Standards Branch.

School authorities will inform the Director, Curriculum Standards Branch of all locally developed/acquired course reauthorizations (including second language courses). New board motions for these reauthorizations will also be forwarded to the Director, Curriculum Standards Branch for all courses (including second language courses).

❶ The waiver prerequisite provision does not apply to any locally developed/acquired and authorized senior high school complementary courses.

Grade 10	Grade 11	Grade 12
Note: The following locally developed/acquired and authorized senior high school complementary courses are NOT to be offered by schools unless prior authorization has been obtained from the local school authority, or Alberta Education in the case of Religious Studies.

Appendix 4

Registered Apprenticeship Program (RAP)

The Registered Apprenticeship Program (RAP) is a program in which students spend part of their time in school and part in industry as registered apprentices in one of the designated trades. Students enrolled in RAP courses are counted as full-time high school students and as registered apprentices.

To enter the program, students must be in senior high school and meet the grade entrance requirement to the selected trade or pass the trade entrance examination. Students enrolling in RAP must be registered with both Alberta Education and the Apprenticeship and Trade Certification Branch, Alberta Advanced Education and Career Development.

Registered Apprenticeship Program courses are classified as locally developed courses. School jurisdictions intending to offer this program should refer to the following policy and service documents:

- *Off-campus Education* policy found in the *Alberta Education Policy, Regulations and Forms Manual*
- *Off-campus Education Guide for Administrators, Counsellors and Teachers*, 1995
- RAP Information Package—available through the Curriculum Standards Branch.

Appendix 5

Advanced High School Diploma 1989–1990 through to 1991–1992

Advanced High School Diploma for Students Who Entered Grade 10 in the 1989–1990 through to the 1991–1992 School Years

Category	Subject	Minimum Credits	Minimum Course(s)	Required Course	Diploma Exam
A	English Language Arts	15	3	Eng Lang Arts 30 or 33	Yes
	Français	15	3	Français 30	Yes
	Social Studies	15	3	Social Studies 30	Yes
	Mathematics	15	3	Mathematics 30	Yes
① B	Science	11	3	Biology 30 or Chemistry 30 or Physics 30 or Science 30	Yes Yes Yes No
② C	Second Languages, Practical Arts or Fine Arts	10	2	See Appendix 6 for approved Category C courses.	No
	Physical Education	3	1	Physical Education 10	No
	Career and Life Management	3	1	CALM 20	No
	72 Specified Credits 28 Unspecified Credits				

The Advanced High School Diploma is awarded to a student who:

1. satisfies the course and credit requirements for a General High School Diploma, and
2. earns credits in English Language Arts 30 or Français 30 (students in francophone programs may present Français 30 as a diploma requirement, but must also present English Language Arts 30), and
3. earns at least 15 credits in social studies, including Social Studies 30, and
4. earns at least 15 credits in mathematics, including Mathematics 30, and
5. earns at least 11 credits in science, including ONE of Biology 30, Chemistry 30, Physics 30 or Science 30, and
6. earns at least 10 credits in Category C courses. See Appendix 6 for approved Category C courses.

An Award of Excellence shall be granted to a student who qualifies for the Advanced High School Diploma with not less than 65% in any one of the four required diploma examination courses, and an overall average of 80% or higher in those courses. This Award of Excellence will be noted on the student's Advanced High School Diploma.

① Note: Students may use Science 30 for Category B requirements beginning in the 1991–1992 school year.

② The Category C requirement applies to the Advanced High School Diploma only and not to the new Alberta High School Diploma.

All locally developed/acquired and authorized complementary courses in fine arts, practical arts, career and technology studies, and languages other than English, will automatically be eligible for Category C status. Jurisdictions will no longer need to request Category C status as is presently outlined in the *Locally Developed/Acquired and Authorized Junior and Senior High School Complementary Courses* policy.

French 31a–31b–31c has been added to the list of second languages courses eligible for Category C status.

Advanced High School Diploma for Students Who Entered Grade 10 in the 1992–1993 and 1993–1994 School Years

Advanced High School Diploma 1992–1993 and 1993–1994

Category	Subject	Minimum Credits	Minimum Course(s)	Required Course	Diploma Exam
A	English Language Arts	15	3	Eng Lang Arts 30 or 33	Yes
	Français	15	3	Français 30	Yes
	Social Studies	15	3	Social Studies 30	Yes
	Mathematics	15	3	Mathematics 30	Yes
① B	Science	15	3	Biology 30 or Chemistry 30 or Physics 30 or Science 30	Yes Yes Yes Pilot
② C	Second Languages, Practical Arts or Fine Arts	10	2	See Appendix 6 for approved Category C courses.	No
	Physical Education	3	1	Physical Education 10	No
	Career and Life Management	3	1	CALM 20	No
76 Specified Credits 24 Unspecified Credits					

The Advanced High School Diploma is awarded to a student who:

1. satisfies the course and credit requirements for a General High School Diploma, and
2. earns credits in English Language Arts 30 or Français 30 (students in francophone programs may present Français 30 as a diploma requirement, but must also present English Language Arts 30), and
3. earns at least 15 credits in social studies, including Social Studies 30, and
4. earns at least 15 credits in mathematics, including Mathematics 30, and
5. earns at least 15 credits in science, including ONE of Biology 30, Chemistry 30, Physics 30 or Science 30, and
6. earns at least 10 credits in Category C courses. See Appendix 6 for approved Category C courses.

An Award of Excellence shall be granted to a student who qualifies for the Advanced High School Diploma with not less than 65% in any one of the four required diploma examination courses, and an overall average of 80% or higher in those courses. This Award of Excellence will be noted on the student's Advanced High School Diploma.

① Note: Students may use Science 30 for Category B requirements beginning in the 1991–1992 school year.

② The Category C requirement applies to the Advanced High School Diploma only and not to the new Alberta High School Diploma.

All locally developed/acquired and authorized complementary courses in fine arts, practical arts, career and technology studies, and languages other than English, will automatically be eligible for Category C status. Jurisdictions will no longer need to request Category C status as is presently outlined in the *Locally Developed/Acquired and Authorized Junior and Senior High School Complementary Courses* policy.

French 31a–31b–31c has been added to the list of second languages courses eligible for Category C status.

General High School Diploma for Students Who Entered Grade 10 in the 1989–1990 through to the 1993–1994 School Years

General High School Diploma 1989–1990 through to 1993–1994

Subject	Minimum Credits	Minimum Course(s)	Required Course	Diploma Exam
English Language Arts★	15	3	Eng Lang Arts 30 or 33	Yes
Français	15	3	Français 30	Yes
Social Studies	15	3	Social Studies 30 or Social Studies 33	Yes No
Mathematics★	8	1	Not specified	No
Science★	8	1	Not specified	No
Physical Education	3	1	Physical Education 10	No
Career and Life Management	3	1	CALM 20	No
A minimum of two 30-level courses other than English language arts and social studies. Note: This requirement may also be met through any provincial or locally developed course offered for 10 credits.	10	2		No
62 Specified Credits 38 Unspecified Credits				
★IOP students who wish to transfer to a General High School Diploma route <u>after completing a Certificate of Achievement</u> require English Language Arts 33 in the following recommended course sequences: English Language Arts 16–26–36–33 (14 credits) OR English Language Arts 16–23–33 (13 credits); Social Studies 33 in the following recommended course sequences: Social Studies 16–26–23–33 (16 credits) OR Social Studies 16–23–33 (13 credits); a minimum of 8 credits in mathematics, including credits in Mathematics 13 or 24; and a minimum of 8 credits in science, including credits in Science 10 or 24. One 36-level course (10 credits) from any occupational cluster will be accepted for students transferring from the Integrated Occupational Program to the General High School Diploma Program to meet the two 30-level courses requirement.				

The General High School Diploma is awarded to a student who has earned 100 credits, subject to the following requirements:

1. English Language Arts/Français—a minimum of 15 credits, 5 of which shall be in English Language Arts 30, English Language Arts 33 or Français 30. IOP students who transfer to a General High School Diploma route require a Certificate of Achievement and a minimum of 13 credits in English Language Arts, including English Language Arts 33. Students in francophone programs may present Français 30 as a diploma requirement, but must also present either English Language Arts 30 or English Language Arts 33.
2. Social Studies—a minimum of 15 credits, including either Social Studies 30 or 33.
3. Mathematics—a minimum of 8 credits. IOP students who transfer to a General High School Diploma route after completing a Certificate of Achievement require credits in Mathematics 13 or 24.
4. Science—a minimum of 8 credits. IOP students who transfer to a General High School Diploma route after completing a Certificate of Achievement require credits in Science 10 or 24.
5. Physical Education—a minimum of 3 credits. See the section on Courses and Programs for individual or class exemption criteria.
6. Career and Life Management—a minimum of 3 credits.
7. 30-level courses—in addition to the requirements in 1 and 2 above, students must present a minimum of 10 credits in at least two 30-level courses. Students who use Français 30 as a diploma requirement must present English Language Arts 30 or 33 as one of the required 30-level courses. The 30-level course requirements may also be met by 30-level “a” and “b” courses; e.g., Industrial Education 30a and 30b. One 36-level course (10 credits) from any occupational cluster will be accepted for students transferring from the Integrated Occupational Program to the General High School Diploma Program to meet the two 30-level courses requirement.

Note: Credits achieved in a non-30-level second language course taken concurrently with a 30-level second language course may be used toward the General High School Diploma requirement of 10 credits in the minimum of two 30-level courses other than English Language Arts and Social Studies. For example, students could have registered concurrently in a high-level proficiency course (such as French 20S, 10N, 20N, French Language Arts 10, 20, Français 13, 10, 20) and the low-level proficiency course French 30. The 5 credits from the higher-level proficiency non-30-level course may be used toward the General High School Diploma.

Appendix 6

Courses Eligible for Category C (Advanced High School Diploma Only)

The Category C requirement applies to the Advanced High School Diploma only and not to the new Alberta High School Diploma.

The purpose of Category C is to ensure that students in the Advanced High School Diploma route have an opportunity to extend and refine their intellectual and practical skills in areas of learning not part of the core program. Category C was defined in the *Secondary Education in Alberta* policy statement, 1985 and revised in June 1989. Courses identified as eligible for Category C fall within business education, career and technology studies, fine arts, home economics, industrial education, physical education and second languages; they are courses that:

- have defined content (special projects and work experience are therefore excluded)
- offer the opportunity to expand personal interests, abilities or career aspirations
- broaden student learning beyond that encompassed by Category A and Category B (courses required by either of the A and B categories are therefore excluded). Category A and Category B courses are specified in the Advanced High School Diploma charts provided in Appendix 5-1 and Appendix 5-2.

The Category C requirement, and its revisions as distributed in June 1989 and as reflected here, apply to Advanced High School Diploma students entering Grade 10 as of the 1989-1990 school year.

Students must earn at least 10 Category C credits for an Advanced High School Diploma.

Courses may be selected from the 10, 20 or 30 levels. Students are not required to earn credits in an approved course sequence that culminates at the 30 level.

The following courses are eligible to meet the Category C requirement.

**Business
Education**

Accounting 10–20–30
Basic Business 20–30
Business Calculations 20
Business Communications 20
Business Education 10–20–30
Computer Literacy 10
Computer Processing 10–20–30
Dicta Typing 20

Law 20–30
Marketing 20–30
Office Procedures 20–30
Record Keeping 10
Shorthand 20–30
Typewriting 10–20–30
Word Processing 30

**Career and
Technology
Studies**

Agriculture
Career Transitions
Communication Technology
Community Health
Construction Technologies

10–20–30

① Students in francophone programs may present Français 30 as a Category A diploma requirement. For these students, the Category C requirement is English Language Arts 10–20–30. French immersion students may apply French Language Arts 10–20–30 toward the Category C requirement.

Locally Developed/Acquired and Authorized Courses for Category C Status

Locally developed/acquired and authorized courses may be accepted for Category C status only for:

- languages other than English
- the practical arts
- the fine arts
- career and technology studies.

Requests for Category C designation for locally developed/acquired and authorized courses in practical arts, career and technology studies, fine arts, and for languages other than English, shall be submitted to the Curriculum Standards Branch. Submissions should be received before May 31 for implementation in the first semester of the following school year, or by December 31 for implementation in the second semester of the same school year.

All locally developed/acquired and authorized courses in fine arts, practical arts, career and technology studies, and languages other than English, will automatically be eligible for Category C status. Jurisdictions will no longer need to request Category C status as is presently outlined in the *Locally Developed/Acquired and Authorized Junior and Senior High School Complementary Courses* policy.

Religious Studies 15–25–35 courses may not receive Category C status.

In developing/acquiring instructional materials, the school board should take into account such criteria as curriculum fit, criteria for promoting respect and understanding, appropriateness for student developmental stages, and criteria for instructional design.

For additional information, refer to the *Locally Developed/ Acquired and Authorized Junior and Senior High School Complementary Courses* policy in the *Alberta Education Policy, Regulations and Forms Manual*.

Appendix 7

Career and Technology Studies Course Reporting

Passed Modules

For the 1996–1997 school year,^❶ student achievement in CTS should be reported to Alberta Education as follows.

Passed modules, those in which a student has successfully completed all module learner expectations to the designated standard and earned a mark of 50% or greater, are to be combined into courses and reported at the end of each school term, January and/or June. Each module equals one credit. The mark submitted for a course is the average of the percentage marks given for each module that has been completed successfully. There are course codes and names for 1, 2, 3, 4, 5 and 6 credits. For CTS course codes, see Appendix 2. Course marks in CTS are to be forwarded to the Educational Information Exchange (EIE) in the same manner as are marks for other courses.

Incomplete (Failed) Modules

CTS module marks between 0% and 24% are not to be reported. Incomplete (failed) modules, marks of 25% to 49% inclusive, will not appear on student transcripts. These incomplete modules are those in which a student has:

- achieved between 25 per cent and 49 per cent of the module learner expectations, and
- attended at least 50 per cent of the classes allocated to the module.

Incomplete (failed) modules are to be reported in one of two ways.

Electronic:

- by combining failed modules, where possible, into CTS courses with course marks between 25% and 49% inclusive, and forwarding the marks to EIE. These incomplete module courses will then be forwarded to the School Finance Branch by EIE.

Nonelectronic:

- by completing the Report of Senior High Student Career and Technology Studies (CTS) Incomplete (Failed) Modules form 94ED01.04B and forwarding it directly to the School Finance Branch.

Challenged Modules

Challenged modules, those in which a student has met successfully the requirement of a challenge assessment, are to be reported as passed modules and reported on the Report of Senior High Student Career and Technology Studies (CTS) Challenged Modules form 94ED01.04A.

❶ For the 1997–1998 school year, Alberta Education is working toward a new structure for collecting, processing and reporting 1-credit CTS modules.

Further Information

For further information relating to the reporting of CTS incomplete or challenged marks, contact the EIE. For information on funding, contact the School Finance Branch. In this handbook, also see under the subsection Module Challenge in CTS and the subsection Reporting CTS Modules.

Modules Completed in Junior High School

Modules successfully completed by students while in junior high school for which the senior high school principal has accepted the recommendation of the junior high school principal, are to be reported by the senior high school principal as passed modules on the Report of Senior High Student Career and Technology Studies (CTS) Modules Completed in Junior High School form 94ED01.04C and forwarded to the School Finance Branch.

General Information

If a student has completed 7, 8, 9 or 10 modules, schools could report that student's achievement by using two course codes. For example, 7 modules successfully completed in Tourism Studies could be reported as Tourism Studies 1A (3 credits) and Tourism Studies 1B (4 credits).

CTS course codes and course names identify the course level and the number of credits (modules) in the course. For example:

Course Code Series	Course Name	Course Level	Course Credit
4563	Tourism Studies 1A	1 (Introductory level)	A (3 credits)
5504	Career and Technology Studies 2B	2 (Intermediate level)	B (4 credits)
6635	Enterprise and Innovation 3C	3 (Advanced level)	C (5 credits)

Course Name

- Use the course name, if the majority of the modules are from one strand.

For example, the course name is Tourism Studies 1A, for 3 credits, when there are two modules from Tourism Studies and one module from Enterprise and Innovation.

- Otherwise, use the course name Career and Technology Studies.

For example, the course name is Career and Technology Studies 2B, for 4 credits, when there are two modules from Tourism Studies and two modules from Enterprise and Innovation.

Course Level

Courses whose modules are primarily:

- introductory, are designated at the "1" level
- intermediate, are designated at the "2" level
- advanced, are designated at the "3" level.

Refer to the following Course Configuration Charts to determine if a course should be designated as "1" level, "2" level, or "3" level when modules in a course come from more than one level (introductory, intermediate, advanced).

Level "3" courses may be used to meet the Alberta High School Diploma requirement for 10 credits at the 30 level.

Course Credits

- Each module successfully completed qualifies for 1 credit. The course name is to include a reference to the number of credits:

1 credit	– E or J	4 credits	– B
2 credits	– F or K	5 credits	– C or G★ or H
3 credits	– A or G	6 credits	– D

★ only at advanced levels

Appendix 8

Programming Principles

Relationship of School Programming to Programs of Study

The development of programs to meet the educational needs of students involves more than one level of planning and decision making. At the provincial level, in accordance with section 25(1) of the *School Act*, planning takes place through the development of programs of study. Programs of study identify the learning expectations for the required subjects that apply to all students, as well as the learner expectations for the optional and complementary courses or programs. Alberta Education seeks broad input from educators, business, industry and the community, in planning programs of study.

At the local level, planning involves decisions about how programs of study can best be implemented with particular groups of students and with individual students. This type of planning is referred to as programming.

- Programs of study are established at the provincial level and apply to all students.
- Programming takes place at the local level and is concerned with effective delivery of the programs of study to the students enrolled. Programming decisions are made by local school authorities, by schools, by teachers and by students.

Programming involves a variety of processes for ensuring effective program implementation. These processes include:

- identifying outcomes for learning (based on programs of study and student progress)
- organizing for instruction
- selecting learning activities
- selecting learning resources
- assessing student progress.

Programming decisions are made best at the local level to ensure that the scope of programs offered and the delivery of those programs is responsive to student growth in learning. Decision making at the local level also provides opportunity for effective use of local resources and for local constraints to be recognized.

General Principles

Outcomes are clearly defined.

The following principles provide a general guide for programming.

Progress in learning is enhanced when the student, the parents and the teacher have a clear understanding of what is to be achieved. A shared understanding of what is expected enables the student, the parents and the teacher to work together, and provides opportunity for each to take initiative in support of learning.

The selection and setting of expectations for student learning should be based on the programs of study. Both general and specific learner outcomes should be set, and these should be linked to specific ways in which students can demonstrate their learning.

Expectations are most clear when the means of determining student progress are identified and communicated to all. The performance and products of student work, and the criteria to be used in assessment, are a part of these outcomes.

Planning is based on assessments of student progress.

Ongoing assessment of student progress informs the student and teacher what has been achieved and what is yet to be achieved. Learning and instruction should be consistent with student abilities and set appropriate levels of challenge.

Learning experiences are connected.

Student learning is cumulative and takes place in a variety of formal and informal settings. Learning is enhanced when what is learned in one setting reinforces and extends what has been, and is being, learned in others.

- **Communication between Home and School**

Parents are the first and ongoing educators of their children. Schools should enable families to continue their involvement with their children's education. The linkage between home and school enables parents and teachers to exchange information, jointly support student learning and ensure continuity of learning experiences.

- **Connections across Subject Areas**

There are many opportunities to connect and apply what students learn in one subject area with what they learn in other subject areas of the curriculum. By making these connections, students' learning in each subject area is enhanced, and their ability to apply learning in new situations is improved. This helps students see the world as a connected whole instead of in fragmented bits.

- Partnerships between School and Community

What students learn in school is enhanced when applied and extended in the community. Involvement in projects, community service activities, mentorship programs and job shadowing makes learning more relevant. Involvement in these activities may also provide significant role models for students and an opportunity to explore future career possibilities.

- Consistency between Curriculum and Assessment

Student learning is reinforced when what is taught is reflected in what is assessed. The methods used in assessing student progress, as well as the subject matter, should be consistent with the learning outcomes that have been communicated to students.

- Coordination between Schools

When students change schools, the coordination of programming and assessment practices between schools can help achieve a smooth transition. Any disruption can be minimized when the receiving school is provided full information on student attainment and learning characteristics. Information on student progress should be referenced directly to programs of study.

Programming responds to the learning progress of students.

Programming involves decisions about time, resources, instructional approaches, assessment and organization for instruction. To maximize the learning for students, programming needs to be flexible and responsive to the learning progress of students.

Flexible programming involves:

- use of time as a resource, recognizing that students learn at different rates
- grouping students according to educational needs, and according to the characteristics of the learning activity
- use of a broad range of learning resources, with selection of particular resources according to learner needs and learning traits
- use of a broad range of instructional strategies to provide a variety of ways for viewing subject matter, as well as the opportunity for individual students to learn in a preferred mode
- use of a wide variety of examples and applications of the subject matter, to provide students with an opportunity to explore and discover areas of relevance and interest
- use of a wide variety of assessment strategies to monitor student progress in all areas of the curriculum.

**Programming responds
to developmental
stages of students.**

During their school years, students go through many developmental stages in their intellectual, physical, emotional and social growth. The stage of student growth in each of these areas is an important consideration in developing and implementing school programs.

Our knowledge of developmental growth and its relationship to student learning has increased greatly in recent years. Much of the information has been outlined in a series of four provincial documents under the umbrella title: *Developmental Framework*.

- *Students' Thinking Developmental Framework: Cognitive Domain*, 1987
- *Students' Interactions Developmental Framework: The Social Sphere*, 1988
- *Students' Physical Growth Developmental Framework: Physical Dimension*, 1988
- *The Emerging Student: Relationships Among the Cognitive, Social and Physical Domains of Development*, 1991.

Indicators of Effective Programming

School programming is effective when it responds to the progress and learning needs of students. The following characteristics and indicators provide a description of programming that recognizes and responds to learning needs.

CHARACTERISTICS

INDICATORS

The progress and learning needs of each student are known.

- Parents are aware of the educational progress and learning needs of their children.
- Teachers are aware of the characteristics and learning needs of individual students.
- Teachers are aware of student progress in previous years.
- Teachers are aware of student progress in other program areas.
- Students are able to describe their learning progress, can identify what they are currently studying and can identify what they will be working on next.

Instruction is based on the student's current level of achievement.

- Students are able to complete successfully the learning activities they are assigned.
- Students show continuous growth in their learning.

Connections are made between what the student already knows and what the student learns next.

- Students can describe the relationship between what they are currently studying and what they have previously studied.
- Students are able to apply learning in situations that require a combination of knowledge and skills from different parts of their programs.

School learning experiences provide challenge.

- Students show interest in their studies.
- Parents comment on student interest and achievement.
- Students experience a wide range of approaches to learning.
- At any given time, different students can be observed working on different tasks.
- Students use a variety of sources to complete their work.
- Students take initiative in and show responsibility for their learning.

Effective Teaching Practices

Good teaching is fundamental to effective programming.

There is no single set of teaching practices that guarantees instructional effectiveness. The literature on effective teaching indicates that a wide variety of techniques can be used, and that their effectiveness arises from thoughtful selection and application, recognizing the nature of the subject matter and the nature of the students to be taught.

The literature further indicates some general characteristics of effective teachers and effective teaching that apply to all levels of schooling.

Effective teachers:

- are clear about instructional goals
- are knowledgeable about the subject matter and strategies for teaching it
- communicate clearly to students what is expected of them—and why
- encourage students to take responsibility and initiative for their own learning
- make effective use of available instructional materials and technologies
- are knowledgeable about their students, adapting instruction to their level of learning and anticipating misconceptions in their existing knowledge
- provide practical applications of concepts studied
- address higher-level expectations for cognitive learning, as well as lower-level expectations which support them
- monitor student learning and provide regular feedback
- set high standards for student performance, and encourage students to set high standards for themselves
- set standards for behaviour that are firm and consistent
- teach the skills of learning how to learn, and give students the opportunity to master them
- integrate their instruction with that in other subject areas
- are thoughtful and reflective in their practices
- create a climate for learning.

By selecting and organizing relevant resources and instructional techniques, teachers can create effective learning environments appropriate to students and subject matter.

In such environments, students should be:

- aware of the learning outcomes, and motivated to achieve them
- engaged in appropriate ways to learn
- aware of their progress in learning
- active and responsible members of a learning community.
